Owner's Manual

Please review the following instructions and make yourself familiar with the parts and function of your E-Z UP® Instant Shelter®.

Parts included:
[1] assembled shelter frame
[1] fabric top
[1] storage bag
[4] stakes
[4] leg skirts

BE SURE FRAME IS UNLOCKED BEFORE SETTING UP SHELTER

Set-Up --Step 1: Place just the shelter frame in the center of the setup area. **UNLOCK THE FRAME** by pulling out the 4 overhang trusses as shown (Fig. A). (Note: You will push in these same trusses to lock the shelter when storing it).

A

Step 2: On opposite sides of the frame with a partner, hold the two outer legs and lift slightly for ground clearance. Take a few steps back and open the frame to full arm's length, approximately four feet (Fig. B).

B

Step 3: With a partner, grasp the trusses where they come together at the metal joint (Fig. C). Lift gently and push upward while stepping back so the sliders rise up but do not lock (Fig. D).

C

D

Step 4: : Install the top at this time. Center the fabric with the peak on the center peak pole (Fig. E1). Be sure to attach the hook and loop straps in each corner pocket to the matching piece on the overhang arms (Fig. E2).

E1

E2

Step 5: Place one hand on the top corner. While pushing down on the corner, press up on the ceiling lift tube until the slider clicks into place (Fig. F). **Do not lift up on the overhang truss as this can damage the frame.**

Step 6: The adjustable legs offer multiple height positions. Tilt one side of the shelter upward and extend the lower leg section until it clicks into place (Fig. G). Repeat until all legs are extended. When extending the legs, have a partner hold the frame stable and avoid having only two diagonal legs extended.

F

G

Take Down --Step 1: Press the lock button and lower each leg completely (Fig. H).

Step 2: At each corner, release the latch and pull the slider down slightly (Fig. I). Be careful to not pinch your fingers. Make sure that **all sliders are in an unlocked position** below the locking hole prior to closing the frame. Closing the frame with any sliders in a locked position will cause damage and/or breakage.

H

I

Step 3: Hold the trusses at arms width, then lift and pull in gently. Be sure to have a partner opposite you in order to prevent frame damage (Fig. J). Be careful to not pinch fingers while closing.

J

Step 4: Hold outside legs and continue closing shelter while walking toward your partner. The completely folded frame will stand on its own.

Step 5: Press the overhang trusses inward to lock the frame.

Step 6: With the shelter standing, slide the bag over the top (Fig. K). Turn the shelter over gently and zipper shut.

K

Note: The shelter top may remain in place for easier subsequent set-up.
