

## **Olympus DS-2400 Digital Voice Recorder**

Lawyers, physicians, students and the like can enjoy the advanced features of the compact DS-2400. The features on this device are endless with a new central navigation pod, superb sound, a large backlit LCD, and great file management options with DSS Player software to help keep you organized. All these supply the professional performance you seek in an easy to use, sleek and stylish package.

### **Dictation Features**

Editing functions (overwrite/insert/delete/security lock).

### **SD Removable Media**

The supplied 1GB SD Card provides an ample amount of memory and the durability and reliability you need in a removable media card.

### **DSS Recording**

DSS format provides highly compressed file size and superior clarity. The new Hi Speed USB lets you save and email files with ease.

### **Programmable Buttons**

Provides customized functions to suit your recording needs with a centralized navigation pod.

### **Convenient File Creation**

End one dictation and begin the next with a simple press of the "New" button.

### **File Edit**

Take advantage of the ability to insert and overwrite on an existing recording file.

### **Benefits**

- Enjoy plenty of recording time with the included 1GB SD Card removable media.
- Never miss a beat with the voice activated Variable Control Voice Actuator feature that records audio as soon as it senses sound. It conserves memory and battery life, too.
- Directly connect to a PC for fast file transfers with convenient PC Link capability.
- A full dot, backlit LCD provides for easy viewing, even in bright conditions, so you can easily watch your recording times, battery life status and more.
- Save files in high-compression DSS format using the included DSS Player software.
- Manage audio files in up to 5 customizable folders.
- New customizable navigation pod.
- Use the easily accessible "Erase" button to quickly erase single files or entire folders.
- Switch between "Conference" and "Dictation" settings.
  
- Choose between SP and QP recording modes.
- Finish one dictation and begin the next with a push of the "new" button.
- Place index marks at specific points in passages for quick retrieval.
- Compatible with voice recognition software.
- Enjoy efficient battery power: up to 32 hours provided by two AAA batteries.
- Compact and lightweight design for easy portability.
