

High Quality Construction Features

Doors, Panels, & Pilasters

Full Honeycomb Core

Doors, Panels and Pilasters are structurally reinforced with 1" (25mm) cell honeycomb bonded from **top to bottom** and **edge to edge** throughout their entire core. The honeycomb reinforcement enhances strength, sound absorption, and overall impact resistance. Note: 1/2" (13mm) vertical honeycomb is used in all stainless steel products.

Clean, Attractive Corners – Mitred, Welded and Ground Smooth

Hadrian's "trademark" corners are unmatched for their clean, attractive appearance. The superior strength of Hadrian's full corner weld offers a hygienic seal and prevents parts from loosening and detaching.

Locking Bar Edge Moulding

All components are tack welded and interlocked under tension with a roll-formed oval crown locking bar for continuous bonding and a permanent, hygienic seal. Hadrian's design meets or exceeds the "rust-out" warranties offered by other manufacturers.

Hinges and Latches

Concealed Hinge Mounting

Hinges are concealed within the thickness of the door, top and bottom, for sanitary, easy maintenance and modern styling. This sleek design eliminates the need for exposed fasteners on the door face.

Metal Hinge Pin with Nylon Sleeve

Utilizing the best qualities of nylon and metal, Hadrian's unique hinge pin offers unrivaled performance. The pin's metal core provides sturdy support while the self-lubricating nylon sleeve ensures smooth, quiet operation. The threaded pin can be easily removed and reinserted if necessary.

Barrier-Free Lever Latch

Hadrian's exclusive thumbturn lever conforms to American Disability Act requirements and the Canadian Handicap Code. It can be activated with a short, easy movement and without finger-grip application.

Safety Release Latch

Both standard and Barrier-Free latch designs allow access from the exterior in case of emergency. The design is minimal for appearance, easy cleaning, and resistance to vandalism. The "Hadrian" name assists maintenance staff in locating the source for replacement parts.

High Quality Hardware

All brackets and door hardware components are zinc die-cast and triple plated with copper, nickel and chrome to a gleaming finish. Pilaster shoes are a one-piece welded design of polished stainless steel.

Hadrian Optional Upgrades

Upgrade Features

Super Reinforced Masonite Core

Ideal for damage-prone locations, Hadrian's Masonite reinforcement strengthens the product's surface sheets while absorbing shocks better than plywood alternatives. 1/8" (6mm) peg-board Masonite is bonded to the inner surface of material walls to encase the 1" (25mm) honeycomb center. The dent resistant toughness of the sections is increased beyond their already tough design.

Stainless Steel Hardware Package

A hardware package with brushed stainless steel wall brackets, hinges and fasteners is available. Standard brackets and hinges are zinc-cast, plated and brush finished to match the stainless steel doors and panels.

The "No-Sightline Solution"

Maximizing privacy, Hadrian's "No-Sightline Solution" completely eliminates all sightline gaps. The full-length rubber bumper on the stop deadens sound and protects against wear. The versatility of the "No-Sightline Solution" means it can be used in new and pre-existing installations. Substitute the Heavy-Duty Continuous Hinge on the hinge side for added strength without compromising privacy.

Heavy-Duty Continuous Hinge

Hadrian's economically priced Continuous Hinge is ideal for high-abuse areas where extra strength and durability are a concern. Made with heavy-duty 16-gauge material, the continuous hinge is available with powder coated or brushed stainless steel finishes. Stainless steel hinge pins are standard on both models. As an added value, Hadrian's continuous hinge also serves as a "No-Sightline" feature on the hinge side of the door.

Finishes and Materials

Stainless Steel

Hadrian's design offers long lasting beauty, gleaming modern appearance, and easy-to-clean maintenance. Doors, panels, and pilasters are type #304, with #4 brushed finish and are virtually impervious to chemical cleaners, spray washing, and sanitizing agents. Stainless steel is ideal for many situations, including:

- High-moisture conditions such as locker rooms, pool areas and recreation facilities
- High-profile, luxurious end users such as theaters and country clubs
- High-traffic areas such as airports, restaurants, and highway rest areas

Embossed Stainless Steel

Hadrian's embossed stainless steel resists extreme high traffic usage without showing wear. It also offers an improved appearance and added protection from abrasions, smudges, and fingerprints. Because this product is available in 60" wide sheets, splicing and seaming smaller widths is not necessary.

POWDER COATING

Superior Technology

Because Hadrian refuses to compromise on quality, powder coating has always been our standard painting process. Hadrian's two state-of-the-art powder coating systems utilize the latest technology to apply a hard, even, run-free finish. After a thorough cleaning and phosphatizing process, electrical charges ensure that the powder paint adheres uniformly over the entire product surface. The powder is then oven cured to create an attractive, permanent and consistent finish.

Durable, High Performance Finish

Powder coating completely covers every area of the product while exceeding the performance capabilities of liquid coated baked enamel finishes. Hadrian's superior powder coated finish resists impact, abrasions, chemicals, detergents and acids.

Thicker paint application helps to combat rust. Powder coating allows a greater paint thickness to be applied without compromising surface uniformity. Wet paints simply cannot achieve the same thickness without the threat of unsightly runs and surface irregularities.

Cutting Edge Colors

The flexibility of powder coating allows Hadrian to offer a color selection that is always on the cutting edge. From smooth flat finishes to "special effects", anti-graffiti and custom colors, Hadrian products feature the most progressive color palette available.

Environmentally Responsible

Hadrian is proud of the fact that its powder coating system is also environmentally friendly. There is virtually no waste, low energy consumption, and no solvent emissions.
