Index

Naturals and Organics

P

packaging, natural preservatives, 461

penetration
  isoflavones, 167–168
  cosmetic ingredients as flavonoids, 168–169
  methods and materials, 170–171
  skin prodrug transformation, 169–170
  test analysis, 171–172

jojoba oil, 149–150
  cuticle conditioning study, 155–158
  formulation uses, 159–164
  hair, 153–154
  nail, 155
  skin, 150–152

perillic acid, illegal natural preservatives, 460

permanent hair dyes, 366–368

Perricone, Dr. Nicholas, skin wellness, 33–34

personal care
  cosmeceuticals, 37–38
    antiaging product ingredients, 39–40
    apricot cream, 43–44
    certified organic moisturizer, 44–45
    food alliance, 38–39
    label ingredient lists, 43
    manipulating product terminology, 41–42
    natural versus organic, 40–41
    regulation, 42, 45–46
  folklore and science coming together, 12
  marketing, 7–8
    aromatherapy, 9
    cleanliness and basic hygiene, 9
    milder and less abrasive, 8
    multi-functionality, 8
    natural surfactants, 8–9
    organics, 10–12
    oxygen bars, 9–10
    spa at home, 10
  sugars role
    antifreeze and cryoprotectant, 383–384
    healing properties, 381
    natural preservatives, 381–383
  personal cleansers, kaolin, 450
  photoaging, Senna alata extract (SNA), 277–284
  photooxidation, unsaturated fatty acids, 264–265
  phytosterols
    mango butter cosmetic application, 195–196
    sun care emollients, 262–263
  pigments, kaolin, 448–449
  plant-derived anti-irritants, Wille, John, 99–101
  pomegranate, top selling ingredient, 106
  Prater, Rick, super-natural naturals, prescription for change, 47–48

preservatives
  advanced formulation, 464–465
  Annex VI regulations, 453–454
  biopein, 121–124
  commercial products, 457–458
  illegal preservatives, 458–460
  ingredients, 454–456
  more than one application, 465–466
  odor reduction, 466–467
  packaging, 461
  processes, 456
  self-preservation of plants, 456–457
  prevention, DNA damage, 277
