

Prelox™ Blue

Nutritional support for male sexual enhancement.*

When you're in your early twenties, it's easy to take peak sexual performance for granted. Yet as time passes, your body's biological system changes, and you may notice your sexual stamina, performance and even pleasure begin to decrease. Getting "in the mood" may start to take a little effort.

Herbalife's Prelox™ Blue offers men a safe, natural way to preserve and maintain sexual responsiveness, endurance and enjoyment.* It includes a blend of powerful ingredients that have been clinically tested, including L-Arginine, Pycnogenol® and Aspartic Acid. These important nutrients help protect, restore and sustain blood-vessel health and improve blood flow to the genital area, naturally enhancing erections and the body's sexual response.*

This formula contains L-Arginine, an amino acid that creates nitric oxide in the body. Studies have shown that nitric oxide improves circulation and blood flow to the genital area and plays a critical role in sex drive and ultimate sexual satisfaction. It is only in the presence of sufficient levels of nitric oxide that the body is able to achieve and maintain an erection.

The other key ingredient, Pycnogenol®, is one of the most powerful antioxidants known to humans and has been demonstrated in clinical studies to expand arterial blood vessels by activation of the enzyme that turns L-Arginine into nitric oxide.

It is a patent-protected ingredient derived from the bark of the French maritime pine tree and has been extensively researched for more than 30 years. Among its many benefits, Pycnogenol® has been shown to improve circulation (thereby increasing blood flow) and to neutralize free radicals.*

To maximize the effects, complement Prelox™ Blue with Herbalife's Optimum Performance™ and Male Factor 1000®. This powerhouse trio of male-specific herbal products is your best defense against diminished sexual performance and your best offense for enhancing one of life's greatest pleasures.*

Discussion Points

- **Enhanced pleasure:** Experts believe that the amino acid L-Arginine not only improves blood flow, but also may exert a neurotransmitter influence to positively affect mood and pleasure.*
- **Healthy circulation:** Pycnogenol® appears to counteract vasoconstriction and reduce platelet stickiness, helping ensure healthier blood flow and better circulation.*
- **Cumulative effect:** Over time with Prelox™ Blue, you will experience a heightened sense of sexual well-being. It is recommended that you take four Prelox™ Blue tablets a day for 14 days (two in the morning, two in the afternoon). After the initial two-week period, take one or two Prelox™ Blue tablets a day (one in the morning, one in the afternoon).
- **A better solution:** While drugs for sexual enhancement may offer a temporary solution or tempting "quick fix," they are associated with unwanted side effects and can be expensive. Prelox™ Blue offers a safe, natural and cost-effective alternative with no unwanted side effects.

Did You Know?

L-Arginine is important for heart health.* And it also plays a role in supporting the skin and connective tissue, making it important for the restoration and repair of soft tissue, the formation of collagen and in the building of new bones and tendons.*
