

# U-GARD™

The Nutritional Alternative To Drugs

## For Gastric Ulcers In Horses

Gastric ulcerations occur in approximately 80% of racing thoroughbreds and horses that perform strenuous exercise. Gastric ulcers are generally recognized as being caused by the stress of stall confinement, training, feeding large amounts of high-starch grain, insufficient fiber in their diet, or long periods between feedings.

The ultimate diet for horses should be free access to grazing grass and a sufficient amount of good quality hay along with a minimum amount of concentrated starchy food to supply the energy needed for the level of work the horse is performing. Performance horses are sometimes stabled up to 23 hours per day while being fed large amounts of starchy foods with limited amounts of hay.

**U-GARD™** was clinically-proven to be effective in decreasing the severity of gastric ulcers in a 73-day racetrack field trial study on thoroughbreds in race training.

**U-GARD™** was voted the "Number One Ulcer Feed Supplement" by *The Horse Journal* and proclaimed Equine Product Of The Year.

**U-GARD™** is formulated with all-natural ingredients. Each ingredient was chosen to perform a specific function, which synergistically allows the body's natural healing process to take place.

**Same major active ingredients as in leading human anti-acid products:**

**Calcium Carbonate, Magnesium Hydroxide, and Aluminum Silicate:** Micro-Sized fast acting anti-acids help neutralize stomach acids.

**Kaolin:** Buffers and coats the horse's stomach lining, thus helping protect it from further damage caused by stomach acids.

**Apple Pectin:** An indigestible form of soluble fiber that acts as a general intestinal regulator used in many medicinal preparations for maintaining good digestive health.

**Aloe Vera Gel:** Super-concentrated crystal form of aloe vera helps to soothe & promote healing of irritated areas of the stomach caused by gastric ulcers.

**If a horse has one or more of the following indications, they probably have a degree of ulcers:**

- Decreased Appetite
- Weight Loss
- Unthrifty Appearance
- Chronic Diarrhea
- Poor Performance
- Episodes of Colic
- Blood in Stool
- Unwilling To Train
- Excess Nervousness
- Bad Attitude

**3 GREAT FEEDING OPTIONS AVAILABLE: SOLUTION • POWDER • PELLETS**
