INSTALLATION INSTRUCTIONS FOR GAINSBOROUGH DUAL SPRUNG OR STRADDLE TUBULAR LATCH SYSTEM

For Dual Sprung System:
- Scribe drilling centres using appropriate template (see over).
- Drill door as shown at Fig. 1A and fit latch.
- Unscrew fixing plates from knob assemblies (see Fig. 1B).
- Insert short screws through 2 small holes and attach the 2 posts to underside of one fixing plate.
- Insert posts through door and latch and fasten 2nd plate with 2 long screws.
- Insert drive shaft through the latch and screw the door knob assemblies to fixing plates until roses make firm contact with door.

For Straddle System:
- Scribe drilling centres using appropriate template (see over).
- Drill door as shown at Fig. 2A and fit latch.
- Unscrew fixing plates from knob assemblies (see Fig. 2B).
- Insert short screws through 2 small holes and attach the 2 posts to underside of one fixing plate.
- Insert posts through door to straddle latch, fit 2nd plate, ensure central fitting, secure with long screws.
- Insert drive shaft through the latch and screw the door knob assemblies to fixing plates until roses make firm contact with door.

Gainsborough Hardware Industries Limited, ACN 004 792 269, ABN 25 004 792 269, 190 Whitehorse Road, Blackburn, Victoria, 3130

Note: Drill Small Holes First

FOR BACKSET 60mm (2 3/4"

FOR BACKSET 70mm (2 3/4"

ALSO SUITABLE FOR 50mm (2") AND 54mm (2 1/4") PRE DRILLED DOORS
Privacy Adaptor Fitting

Instructions Enclosed

Installation procedure for privacy adaptor which suits Gainsborough fashion knobsets when used in conjunction with Gainsborough self-aligning latches for internal doors 33mm – 40mm (1¼” – 1½”) in thickness.

For thicker doors up to 50mm (2”) you will require an extended screw and spindle kit (KT137).

Fig. 1

1. Self-aligning latch
2. Inside assembly (snib side)
3. Brass posts (supplied with knobset)
4. Spindle
5. Outside assembly (emergency release side)
6. Emergency release bar
7. Emergency release bar hole
8. Short Screws
9. Long Screws

Note: These items replace the fixing plates and spindle supplied with the Gainsborough Passage Set.
Privacy Adaptor Fitting Instructions

Note: All numbers in brackets ( ) denote an item in Fig. 1 on back cover.

1. For older doors (B) drill additional 8mm hole as shown in red from ‘inside’ door face (snib side), after which installation is identical for A. & B. doors.
2. Fit Gainsborough ‘self-aligning’ latch (1).
3. Insert two short screws (8) through ‘inside assembly’ (2) and firmly attach ‘brass posts’ (3).
4. Locate spindle into square hole in ‘inside assembly’ and insert ‘brass posts’ (3) and ‘spindle’ (4) through latch until assembly makes firm contact with door face. See Fig. 2.
5. Insert long screws (9) into ‘brass posts’ for a few turns.
6. Ensure that ‘emergency release bar hole’ (7) is facing upwards and slip the keyholes in the ‘outside assembly’ (5) over the protruding screw heads and slide downwards. See Fig. 3.
7. View assemblies from edge of door and adjust for level. Tighten screws firmly in keyhole slot.
8. Insert ‘L’ shaped ‘emergency release bar’ (6) into ‘outside assembly emergency release bar hole’. See Fig. 1.

Note: Please ensure your doorstops have adequate clearance to prevent damage to your knobset or wall.
