

Motorized Projector Lifts

Complete any [executive](#), [industrial](#), [commercial](#) or [educational](#) projector installation when you specify a Da-Lift motorized lift. Advance Da-Lift motorized projector lifts are designed to raise or lower video projectors weighing up to [300 pounds](#) with the push of a button or using a remote control.

Our newest Advance motorized projector lifts, Da-Lift Pivot 26P and 33P, utilize a [tilting feature](#) that is engineered and designed with a fixed pivot point that helps [insure proper projector alignment](#) during and after installation.

All Advance Da-Lite motorized projector lifts are manufactured with [heavy-duty steel](#) construction using rack and pinion or screw drives rather than noisy chain mechanisms associated with other motorized lifts. All Da-Lifts are powder coated for good looks and [easy maintenance](#), all models are also available with optional plenum kits.

New from Advance, is the [Da-Lift Pivot Motorized Projector Lift](#) available in white powder coated finish and a choice of two sizes. The Da-Lift Pivot comes complete with an Advance UPM-1 universal projector mount, pre-wired duplex female receptacle and duplex plate, internally mounted control switch for installer operation. The Da-Lift Pivot is designed to mount in either suspended or drywall ceilings with your choice of infrared or radio frequency remote operation. The Da-Lift Pivot Motorized Projector Lift can hold up to 25 pounds.

Available in five sizes and specifications, the [Da-Lift Motorized Projector Lift](#) can handle raise and lower video projectors weighing up to 300 pounds. The Da-Lift is over-engineered to meet the most demanding installations, its heavy-duty all metal construction uses a rack and pinion system to smooth and quiet operation, eliminating the need for noisy chain drives. Easily adjusted to fit flush with ceilings, the Da-Lift comes complete with a three position control switch and cover plate.
