A bit about our product line:

GC®, our signature herbal blend that we have been known best for since 1998, is the Gout Care product proud to be keeping people gout pain free since its introduction. GC® successfully aims to keep all uric acid production in a soluble form and expelling from the body to avoid its crystallization and damage in the joints, tissue, fat, and organs. The herbs in **GC®** are beneficial to all walks of life, gout or not, as amazing support to the blood, liver, kidneys, digestive and immune functions. Even more wonderful is its safety and ease on the body's acceptance of these food source based herbs making daily consumption not only possible but advantageous. A blend of all natural, organically grown, pharmaceutical grade ingredients which include **Aged Low Odor Garlic, Turmeric Powder, Artichoke Powder, Milk Thistle (Silymarin) Extract, and Yucca Stalk** make this proprietary formula second to none. For serious gout control there is nothing that even comes close. We are also excited about our constant feedback on its aid in other interrelated disorder areas such as Hypertension, Cholesterol Control, Diabetes Type 2, other Arthritic Conditions, Stones, and many more. The herbal combination in addition to our suggestions on a proper balanced diet, proper water intake for your body type, and our other two products below has addressed areas extending well beyond gout touching on some underlying issues that can create uric acid problems in the first place. Simply by adjusting the body to a less acidic and less toxic environment aids to limit or eliminate the once perfect hosting grounds for disease. Our goal is to not only provide you with a product to work on properly dealing with uric acid production and excretion, but also provide information and guidance on improving your health in general by addressing some of the reasons you may have a problem with uric acid control at all. We look forward to working with you!!

Friendly Fighters® Probiotic Therapy was introduced 2006 and although we had been highly recommending the use of a Probiotic since our start in 1998, we had yet to come across a shelf stable formula we felt worthy of providing to our very valuable customer base. After years of research, we are proud to have such a great product to now offer and cannot stress enough its importance in use as an addition to body for everyone from the gout sufferer to children, parents, and grandparents alike. The daily ingestion of good bacteria is not only very safe, but very helpful as support to the gastrointestinal system that we tend to challenge more and more everyday. From stress, illness, chlorinated water, our diet, the air we breathe, medications we take, overuse of antibiotics, to simply the natural state of aging causes a reduction and challenge to the friendly bacteria in our body vital to the health of our digestive system. Given that over 70% of the immune system is in the digestive tract, it would certainly warrant the importance of having enough of the "good stuff" on your side and fighting for your health daily. With all that challenges that possibility daily and the very strong and stubborn bad bacteria that likes to take residence and rule the intestinal area, it is a must that we fight and fight to win. Without enough good bacteria the bad will take over slowly but surely leaving you that much more susceptible to disease of all kinds. **Friendly Fighters®** contains three uniquely selected viable good bacteria strains, is room temp stable without the need for refrigeration, and able to withstand the stomach acids for successful bypass into the intestines to enhance the body's natural defensive mechanisms. Probiotics have been shown in studies to stimulate the immune system, help to digest dairy products by manufacturing the enzyme lactase, have powerful anti-carcinogenic qualities helpful against certain cancers and tumor growths, help to lower the bad cholesterol, aids to synthesize the B vitamins, promote regularity and overall digestive tract functions, help to recycle estrogen for women, counteract the negative effects of antibiotic use, and create their own natural antibiotics used by the body to fight illness, infection, yeast, and any other disease causing pathogens that threaten their territory. With regard to Gout in particular it has shown to help lower uric acid levels. Additionally, by improving digestive function and regularity you are allowing the uric acid to be expelled properly as the bowels are responsible for over 30% of uric acid elimination. **Friendly Fighters®** Probiotic Therapy aids to improve digestion which will allow the **GC®** Gout Care herbal blend to be properly absorbed and utilized to its maximum potential by your body and to boost your immune function to help expedite your cleansing and healing process.

Body Boost® Mega Multivitamin/Mineral with Antioxidant and Herbal contributions is also a new product of 2006 and one we are extremely excited about. The importance of vitamins goes without saying, but finding the right one can be very challenging as we each find ourselves with different needs by comparison to diet and lifestyle. For years we have recommended several necessary vitamin sources, particularly ones that arthritic/gout patients tend to be more deficient in such as A, E, and B5. With the exception of very few, the body does not naturally manufacture its own vitamins, so we must rely on obtaining them through our diet. That has become increasingly difficult due to most of our typically poor food choices and availability of selection, as well as the ever changing and decreasing quality of the very soil our food grows in. Add to that the many foods, beverages, cooking methods, and medications that actually leach vitamins from our body that have become an even larger part of our lifestyle and we wind up with a very serious problem of rapidly growing deficiencies. As a society, we tend to be unaware of what we may be missing and the importance of how it may be contributing to our health or lack thereof. These very deficiencies can certainly add to the possibility of disease growth and surely diminishes the body's ability to fight against disease properly. As we age, cellular degeneration (cell death) is inevitable, but occurs at an alarmingly rapid rate without enough vitamins, minerals, and good bacteria in the body. Every dying cell not only releases uric acid but also releases free radicals, which as you know can be the beginning of cancerous formations. Needless to say, the more we take a proactive approach to decreasing this likelihood and increasing our health to fight disease of all forms, the better chance we have at repairing and controlling the present disorders while also attempting to prevent others from forming. Diet and lifestyle changes are your absolute best avenue for increasing your health and immunity. Still the addition of certain supplements are necessary to provide the body with what may be lacking in even the most well balanced diet, as well as to help repair the damage already done up to this point. Gout/Arthritis and other inflammatory, chronic, and immune suppressive disorders are simply a cry out for help from your body. They are strong warning signs of dysfunction not to be ignored or overlooked, but to take very seriously and heed to immediately. While **GC®** alone addresses uric acid directly to dissolve and dispose of the crystals causing your pain, infection, and damage our other two products help to target the larger picture possibility. Whether you purchase from us or from a trusted local health food store who could guide you to their best vitamin and good bacteria products is really up to you. What we want to stress beyond our **GC® Gout Care Herbal Blend** is the necessity to not overlook two areas that could be lacking and causing part of your uric acid problems (especially if you suffer with more than just gout like Hypertension, High Cholesterol, Diabetes, IBS, Reflux, Fibromyalgia, etc.) in addition to the need for a more balanced diet and proper pure water intake daily. We will be more than happy to help you address your health in general beyond your gout condition for your quest at getting to the root cause of this and other interrelated disorders.
