Elixir
GUITAR STRINGS
FROM GORE

SOUND
QUALITY
THAT
LASTS®

GREAT SOUND LONG LIFE.

ELIXIR® Guitar Strings feature original POLYWEB® coating or new, ultra-thin NanoWeb™ coating. Both represent a unique patented polymer coating process that protects wound strings from contamination by perspiration, dirt, and body oils - offering extended musical life and great sound.

Original POLYWEB Coating Ultra-thin NANOWEB Coating Regular Uncoated String

Advanced musicians report that the musical life of ELIXIR® Guitar Strings is greater than three times that of regular strings. The coating will wear with playing time, but the string tone is consistent during wear.

ELIXIR® Guitar Strings are simply the best value for acoustic, electric, bass, mandolin, banjo and classical strings.

MORE TIME TO PLAY.

You have better things to do than change your strings. That's why great musicians, casual players and leading guitar manufacturers choose ELIXIR® Guitar Strings for their instruments.

PLAY AWARD WINNING STRINGS.

Acoustic Guitar Magazine Players' Choice Award

ELIXIR Strings have been selected as the Players' Choice Gold Award winner for Steel Strings in 1999 and 2000.

Musikmesse International Press Award

The worlds leading music press voted Elixir Strings to win the strings category at the 2000 Musikmesse International Press Awards in Frankfurt. Selection criteria included overall quality, product design and innovation.
