

1800 GALLONS PER HOUR

POOL COVER PUMP

REMOVES WATER FROM YOUR POOL COVER AUTOMATICALLY

Model Number: H53SP-24

New from Rule Pool Systems comes the next generation in automatic pool cover pumps. Rule, the worldwide leader in pump technology, developed the new 1800 GPH pump in conjunction with leading pool cover manufacturers.

NEW IMPROVEMENTS:

- **Unibody Construction** Reduces possible leak paths
- **Thicker Shaft Seal** Our patented seal technology just got better
- **Housing** Valox is a tougher plastic that resists harsh environmental conditions

The pump still features a powerful 1800 gallon per hour automatic motor with a specially designed strainer base that filters out leaves and debris. Just attach a standard garden hose and plug in the pump. Starting and stopping is completely automatic.

SAME GREAT FEATURES:

- **Fully Automatic Operation** just plug it in and forget it. Brings water level down to less than 1/2"
- **Wide Strainer Base** protects against jamming from leaves and debris while keeping the pump upright
- **Freeze Protection** leave it on the cover all winter long with no damage to the pump
- **Low Power Consumption** only 100 watts

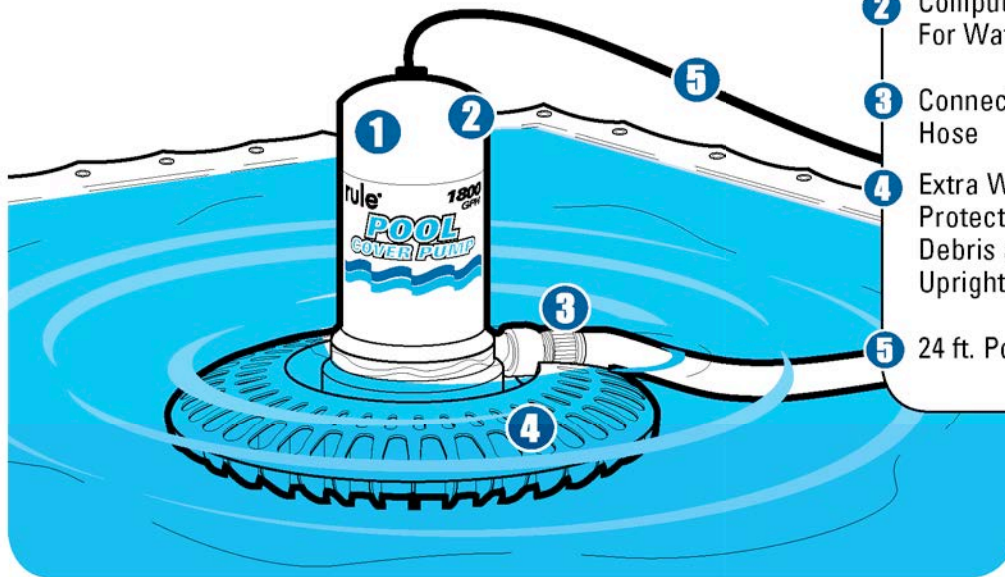

1800 GALLONS PER HOUR

POOL COVER PUMP
