

Aminogen®

Improve your assimilation of dietary protein.*

Protein is a complex organic compound and building block that is crucial to repairing and maintaining muscles and connective tissue in the body, not to mention regulating the body's water balance. Protein is a building block for our muscles, bones, cartilage, skin, hair and blood, so it's important for our body to absorb it properly.

Just because you're eating a diet containing adequate protein doesn't necessarily mean your body is able to assimilate and make use of that protein. In fact, many people fail to fully digest and absorb the protein in their diets. That's where Aminogen® comes in.

Getting enough protein every day is essential to your health. Approximately 20 percent of the total daily calories should come from a protein source such as meat, cheese, milk, soy products, fish and eggs. Additionally, many plants and grains serve as protein sources.

With its patented enzyme technology, Aminogen® contains specially selected enzymes that help break down protein foods into their constituent amino acids, making it easier for your body to absorb and utilize them.* Take one tablet with each protein-containing meal to optimize your body's use of the protein in your diet.

Protein is broken down by digestion into 22 known amino acids. Eight are essential, which means they can't be manufactured by the body, and the rest are non-essential—they can be manufactured by the body with proper nutrition. When you take Aminogen® you help your body ensure that it gets the protein it needs.

Discussion Points

- Animal-free: Aminogen® is an all-natural dietary supplement that contains no animal products, making it ideal for all diets, including vegetarian.
- Combine with other products: Aminogen® can be used in conjunction with the Thermojetics® Weight-Management Programs and Herbalife's entire line of nutritional products.

Did You Know?

Protein foods are broken down by enzymes in the digestive system into building blocks known as amino acids. These amino acids are then reassembled in various combinations to produce your body's tissues, hormones, antibodies and enzymes. When protein digestion is incomplete your health suffers. Aminogen® helps ensure a better assimilation of dietary protein.*

Fast Facts

- Aminogen® is based on patented enzyme technology available only from Herbalife.
- Contains calcium.
- Take at least one Aminogen® with each protein-containing meal.

SUPPLEMENT FACTS

Serving Size: 1 tablet
Servings per container: 60

	Amount Per Serving	% Daily Value*
Calcium (as calcium carbonate)	76 mg	8%
Patented Protease (from Aminogen®)	250 mg	†

* Percent Daily Values are based on a 2,000 calorie diet.

† Daily Value not established.

Other Ingredients: Microcrystalline Cellulose, Stearic Acid, Hydroxypropyl Cellulose, Maltodextrin, Corn Starch, Sodium Starch Glycolate, Sodium Carboxymethylcellulose, Silicon Dioxide, Magnesium Stearate, Dextrin, Dextrose Monohydrate, Soy Lecithin, Sodium Citrate and Carnauba Wax.

Suggested Serving: Take one tablet with each protein-containing meal.

For Maximum Results: Use this product in conjunction with other Herbalife products.

†Patented Aminogen® contains specially selected protein enzymes which act to improve assimilation of dietary proteins.

* Aminogen® is a registered trademark of Body Mechanics.
