Other than the human voice, music is the original interactive medium. It remains the most beneficial learning resource for newborns, infants and babies today. For maximum brain development, young ones require appropriate stimulation, and special care must be paid to avoid over-stimulating them. Over-stimulation may lead to other problems down the road, most notably, ADD. Therefore, high-quality music that is age-appropriate and effective is the best way to give a baby the proper start in life.

Created by award-winning composer and international baby music expert, Raimond Lap, Lovely Baby CDs are the first and only original music series in the world specifically created for babies, ages prenatal to 36 months. Through carefully crafted arrangements, these original recordings have been optimized for a baby's sensitive ears, and contribute to their emotional, intellectual and physical development.

Raimond integrates baby, toy and nature sounds - along with an assortment of styles and musical elements - into this primarily all-instrumental series, that stimulates babies' brains. This music also produces extraordinary physical responses from its young listeners.

Millions of babies in more than 80 countries have benefited from the music of Raimond Lap. With music so overwhelmingly successful around the world - regardless of ethnic background, nationality or native language - Lovely Baby CDs are truly the international language of babies! These unique recordings both stimulate and relax babies. By gently stimulating babies and putting them in a positive mood, they are in the most receptive frame of mind to learn and develop. This "revolution in edutainment" has been embraced by the early childhood development and early literacy communities, and is used in elite infant education programs around the world, including those of the U.S. Military.

One of the biggest reasons Lovely Baby CDs are so successful is that grown-ups love this music as much as their babies do. The simple fact is - if parents don't find the music appealing or just can't "deal with it," they will not play it for their babies. Lovely Baby CDs are appreciated so much that they are played more often and for longer durations of time than other "baby music."

What our customers have to say:

If you're a parent, know that you will be pleasantly surprised to see your baby's reaction.

- Carmen Olivieri

Eddie and I listen to your music everyday and my entire family has grown to see the importance of playing music to infants.

- D. Bonk - Edison, NJ

Truly unique - a refreshing alternative to anything out there.

- Lynn Marie / Ft. Lauderdale, FL

He's been a listener since he was born and loves his "Lovely Baby music," especially the classical. And I love giving it!

- Dorothy Mayer Monigan - Bradford, NH

We quickly bought the series and since they arrived our whole family has enjoyed the music daily.

- L. Reznick (mom to Miriam) - Portland, OR
