OpticsPlanet, Inc. Announces The Addition Of TZ Cases

OpticsPlanet, Inc. Now Carries the Distinguished Line of TZ Cases

United States of America (Press Release) February 18, 2009 -- Northbrook, IL – February 18, 2009 – OpticsPlanet Inc., the leading optics retailer, has announced that it not carries TZ Case products. Not enough can be said about the invaluable protection and lifelong support that **TZ Cases** consistently provide. Most are taken aback by their **sleek design** and cunning perspective on functionality, and the rest quickly become of its **ergonomics**. No matter which of the many features hit you first, T Z Carrying Cases will change the way you think about carrying cases.

Whether you need a case for business, beauty, sports, or even a custom occasion, **TZ** has the goods that work. With over 30 years of manufacturing experience, **T.Z. Case** produces quality cases that are used in dozens of applications. Their **cases** come in a variety of styles, sizes and finishes. All materials are carefully selected and are then assembled in their own factory, resulting in a product that is both attractive and functional. From small, stylish beauty cases and impressive custom cases to large gun cases and bow cases that roll smoothly on inline skate wheels, all of the products have been designed with the consumer in mind. In terms of protection, do not let a TZ case's basic structure fool you. The II Amendment Series are built with **maximum reinforcement**, including aluminum extruded frames, alumi-tech panels, and weather resistant seals. TZ has synchronized heavy duty construction with stealthy accentuations to create a gun case that will have you prepared for anything.

TZ waterproof cases utilize elephant-skin toughness and omnipresent dust and moisture protection to keep your firearm in perfect condition. All cases from TZ Case meet airline requirements for firearm transport. TZ has revolutionized gun carrying cases, from their ProEdge Series to their Cape Buffalo line. OpticsPlanet.com is the place to find these elusive attaches.
