The Planning Worksheet feature in Navision Attain allows users to determine which MRP-generated action messages to carry out.

Navision Attain for manufacturing allows you to instantly change manufacturing methods and processes, helping you to keep up with changing customer needs. Modify components and operations on-the-fly, even on released production orders. Implement realistic plans according to your capacity demands, and redefine order modifiers, re-order policies, capacity, calendars, and manufacturing policy options.

Being able to respond quickly to customers gives you a competitive advantage. Navision Attain for manufacturing provides visibility into all aspects of your manufacturing processes and makes it easy to respond to emergencies immediately because they are easy to spot, track and act upon. When customers know that you can answer any question about an order at any given time, they will continue to do business with you.

The shop floor visibility provided by Navision Attain helps you quickly identify processes that can be changed to operate more efficiently and profitably. It also helps you design new processes easily. Navision Attain for manufacturing helps you improve business performance from the shop floor to the bottom line.

Navision Attain for Manufacturing Product Overview

Basic Manufacturing:

- Order processing for sales, purchase, production, service and transfer orders
- Production of Bills Of Material (BOM), including phantom BOMs
- Version management of BOMs and routings
- Production orders including simulated, planned, firm planned, released and finished orders
- Planning of production orders from sales orders as standard, project, or multiline production orders
- Reservation system for hard and soft allocation
- Blanket orders for long-term contracts
- Serial and lot number processing
- Flexible costing system for standard, average, FIFO, LIFO and specific costing
- Multi-dimensional tracking and pegging
- Forward, backward and manual flushing
- Consumption and output journals
- Production reports
- Cost tracking and handling of landed cost

Supply Planning:

- Order promising, including both available-to-promise (ATP) and capable-to-promise (CTP)
- Multilocation in planning for efficient information and material flow through the supply chain
- Forecast and Master Production Schedule (MPS)
- Intelligent MRP scheduling including regenerative, net change and action message planning
- Interactive action messages
- Simultaneous planning of materials, capacities and costs
- Item availability windows to instantly view the results of MRP
- Multiple worksheets for the review of various production options
- Make or buy decisions implemented on-the-fly
- Variants in planning

Capacity Requirements Planning:

- Finite loading
- Work and machine centers
- Shop calendars and work shifts
- Routings
- Parallel scheduling
- 'Send ahead' functionality for just-in-time (JIT) production
- Routing link codes for automatic flushing
- Scrap and stop codes
- Automatic flushing of the work center or machine center provides automatic recording of expected output
- Subcontracting by work center or operation

Additional Features:

- Multiple units of measure
- Item variants
- Handling of foreign items in inventory
- Inventory administration
- Item availability

System Requirements:

Navision Attain supports graphical 32-bit technology and genuine client/server, multi-tasking environments. The following operating systems are supported:

- Client 32-bit: Windows 2000, Windows NT and Windows 98
- Server 32-bit: Windows 2000, Windows NT, Windows 98, HP UX, IBM AIX, SINIX
