

SilverCorner.com Ring Sizer

There are 2 different ways to measure your ring size.

1. **Print:** You must first print this file. Prior to printing, you must check the print options box and make sure that "shrink" or "expand" to fit paper size is **NOT** selected.
2. **Actual Ring:** If you have a ring in your possession and wish to order the same size, you may compare that ring to a print out version of this file.
3. **String/Paper:** You may also use a non-stretching piece of string or a piece of paper to measure your ring size. Please remember that it should be snug but not too snug.
4. **Please Note:** These are approximate measures only and that the actual fit of a ring depends on a number of factors such as temperature, ring design, and other considerations.

Actual Ring:

Measure your ring against the chart below.

Sizing Alternative:

Wrap a piece of string around finger and then note the length. Compare to chart below.
