

ZNS-NVR Series

IP NETWORK VIDEO SURVEILLANCE SYSTEM

The ZNS-NVR Series is a Digital Video Recording and remote surveillance software package for GANZ™ IP Cameras and Megapixel IP cameras, and most of the industry's standard IP cameras.

Advanced Surveillance Features

- User-friendly wizards and comprehensive user management
- Intuitive user interface requires little to no training
- Network camera search wizard to find all available Network(IP) cameras
- Digital PTZ functionality on all cameras in live and recorded mode
- Bandwidth throttling
- Permissions can be assigned at the individual, group, and server levels
- Archive can be accessed directly from the file tree
- Time Date search is easily accomplished through a scalable scroll bar
- Supports an unlimited number of cameras (hardware limitations may apply)
- Multiple clients can be connected to a single server
- Client can be connected to multiple servers

- Server can run as a Windows service
- Frames upload to an FTP server or to a Network Drive
- Full-featured local and remote playback with search on motion and areas of motion
- Screen may be configured for the wide screen monitors (WXGA)
- Web client is also available
- The ZNS-NVR Series consists of two applications: the DVR Server and the DVR client
