

# TerraLUX<sup>®</sup> MaxCharger5<sup>™</sup>

## Finally an LED Replacement for the Mag Instruments<sup>®</sup> Rechargeable Flashlight Bulb

TerraLUX is not affiliated with Mag Instruments<sup>®</sup> nor are our products endorsed by them.

### Features

- 130 Lumens of Light Using the Latest 5 Watt Luxeon K2!
- 100,000 hr Rated Life
- Shock Mounted for Durability
- 4-5 hour Runtime-not 1 hour!
- Electronic Regulation for Rock Steady Light Output.
- Never Needs Replacing
- Pure White Light
- Consistent Brightness and Color Regardless of Battery Condition

### Specifications

- 5WATT LUMILED K2 LED
- 4-5 HR RUNTIME ON FULLY CHARGED BATTERIES AT FULL BRIGHTNESS. REMAINS LIT FOR 20-30 HRS AT LOWER BRIGHTNESS
- SOPHISTICATED SOLID STATE ELECTRONIC REGULATION
- 6 DEGREE FOCUSED BEAM FOR LONG THROW DISTANCE

Shock Mounting Collar Not Shown for Clarity

### *Introducing the All New MaxCharger5*

- ***EXTREMELY INTENSE LIGHT*** output comes from the combination of a **5 Watt Luxeon<sup>®</sup> K2 LED** and the PowerPush power management circuitry. The **MaxCharger5** uses the brightest white LED currently manufactured. It produces approximately **130 Lumens** of light output.. The fixed focus total internal reflection (TIR) optics ensure a narrow 6 degree intense beam as well as good side illumination.
- ***NEVER BURNS OUT.*** With a rated 100,000 hr life you should never need to replace a bulb again! No more delicate, expensive bulb to handle.
- ***LONGER BATTERY LIFE*** results from the **PowerPush<sup>™</sup> circuit** built into the unit which completely utilizes the power from the batteries, while maintaining constant light output. Expect a 4-5 hour runtime instead of 1 hr.
- ***SAVE MONEY!*** Rechargeable batteries must be replaced after about 300-1000 cycles. The longer run time with the **Max-Charger5** means fewer charging cycles and more money in your pocket. ***PAYS FOR ITSELF IN BULBS AND BATTERIES.***
