

## Natural-Colors Henna Hair Color Selection Chart

Baka Natural-Colors™ gently and temporarily tint hair. They are not the same as chemical colors in that they cannot "lift" color (cannot make dark hair lighter) and do not eliminate the natural color of your hair. This color selection chart shows what results you can expect from using Natural-Colors.

To use the chart, select your natural hair color across the top of the chart and the Natural-Colors Shade along the left side. Where the two intersect is the color you can expect your hair to be after using Natural-Colors.

For hair that has a significant amount of gray and for lighter blonde hair, see special recipes for tips on how to strand test and to get the best results.

Henna Color	Your Natural Hair Color						
	Black	Dark Brown	Medium Brown	Light Brown	Red	Dark Blonde	Medium Blonde
