

PO Box 8025 -- Elburn IL 60119 USA -- 877-768-3892

## FOR IMMEDIATE RELEASE

Web store [www.tributek.biz](http://www.tributek.biz) is a new source of plastic welder parts and supplies. Quality, all-new, U. S. made ultrasonic converters, boosters, and other parts and supplies, are available for quick shipment from stock.

These are all-new items, not refurbished or rebuilt items recovered from scrapped or auctioned machines. Ultrasonic converters, for example, are made of all-new components manufactured from certified materials under tight quality control. Sophisticated testing and proper aging assure excellent performance and durability. While these converters are all-new and carry a similar warranty to OEM converters, they are priced much like rebuilt or refurbished converters currently on the market.

Other items on the web store are also made under strict quality control in U. S. facilities from all-new components, and are priced to deliver exceptional value.

Supplier [www.tributek.biz](http://www.tributek.biz) plans to continue to broaden their product offering in the coming months.
