

Lifestyle® V-Class

HOME THEATER SYSTEMS

*Lifestyle® V30 home theater system
(with Jewel Cube® speakers)*

*Lifestyle® V20 home theater system
(with Direct/Reflecting® speakers)*

PRODUCT POSITION:

Lifestyle® V-Class home theater systems work with your component sources to deliver premium 5.1-channel surround sound. So you can experience the full, emotional impact movies and music are meant to deliver. They contain a host of innovative Bose® technologies, such as the ADAPTiQ® audio calibration system that customizes sound to the unique acoustics of your room. And they simplify the connection and use of multiple video sources, including those with HDMI. They enable both audio and video switching at one touch of a button while automatically upconverting all video to the optimal resolution your TV can accept, even up to 1080p. The Lifestyle® V30 home theater system is our finest Lifestyle® V-Class system. It features our award-winning Jewel Cube® speaker arrays. Also available is the Lifestyle® V20 system, featuring our Direct/Reflecting® speakers.

KEY CUSTOMER BENEFITS:

- Versatile system works with your components to deliver exhilarating surround sound.
- Adjusts to the acoustics of your room.
- Hideaway media console lets you easily attach and conceal all your components.
- Automatic video upscaling ensures movies and sports are in the highest resolution your TV can accept – including 1080p.
- Delivers one-button simplicity. Press a single source button to get the audio and matching video.
- A single remote puts you in control of all your home theater components.
- Expands easily so you can enjoy music throughout your home.
- Four inputs for video sources – DVD, cable/satellite, AUX and VCR, two with HDMI.
- Five digital audio connections.
- Dolby, DTS, AAC, NTSC and PAL support.

Lifestyle® V-Class

HOME THEATER SYSTEMS

FEATURE	FUNCTION	BENEFIT
Lifestyle® integrated systems design	All elements designed to work together in harmony with a variety of external sources.	Delivers performance, versatility and elegance unmatched by most conventional component-based systems.
ADAPTiQ® audio calibration system	Bose® technology that automatically customizes the sound of the system to the room.	Allows greater freedom of speaker placement. Eliminates the need to adjust tonal controls for great sound.
Hideaway media console	Breaks up the footprint of a traditional receiver into two sleek, elegant pieces.	Replaces the need for a large, complex receiver and lets you hide more equipment out of sight.
Standalone display panel	Allows complex functionality from a simplified visual interface.	Unlike complex receivers that have big knobs and an array of confusing buttons, the display is simple to use.
Video upconversion	Converts composite video to S-video; converts composite video and S-video to component video; converts composite video, S-video and component video to HDMI.	Simplifies operation by allowing a single connection between the Lifestyle® V30 system and your TV. You won't have to change inputs when you switch sources.
Video upscaling	Automatically improves the video signal from all sources to the highest resolution the TV can accept over HDMI, up to 1080p.	Provides the highest-quality video that your TV can accept, so that everything you watch on your TV looks as good as it possibly can.
HDMI input	One cable for both audio and video.	Simplifies the connection and use of multiple sources.
Control integration <ul style="list-style-type: none"> • Universal radio frequency remote • TV sensor 	RF remote control operates most functions on connected IR-receiving equipment such as TVs, DVD players, VCRs, cable boxes, satellite receivers, personal video recorders, gaming devices and CD changers.	Allows one easy-to-use remote to control the system and all connected devices. Pressing just one source button gives you the correct audio and video at the same time.
Abundant inputs/outputs <ul style="list-style-type: none"> • HDMI, component, S-Video, composite • Digital, analog and coaxial audio 	Allows connection of up to four external video sources (including two HDMI) and five audio sources. Inputs for DVD, AUX, VCR and cable/satellite, each with connections for composite, S-video and component, and two with HDMI inputs.	You can select from up to four video devices with the touch of a single button on the remote control.
Automatic audio/video synchronization	Automatically delays audio while the video processor enhances the signal, so that the two stay synchronized.	Keeps sounds and movements together – what you hear is in step with what you see.

Lifestyle® V-Class

HOME THEATER SYSTEMS

FEATURE	FUNCTION	BENEFIT
Direct/Reflecting® speaker technology (available in the Lifestyle® V20 system)	Re-creates a natural blend of reflected and direct sound.	Delivers more open, spacious sound throughout the listening area.
Jewel Cube® speakers (available in the Lifestyle® V30 system)	Delivers mid and high frequencies from tiny speaker enclosures.	Design allows for speakers that are small enough to fit in the palm of your hand and blend elegantly into almost any décor.
Acoustimass® module with Bose® proprietary technology	Allows prodigious airflow at the lowest frequencies without port compression or other audible artifacts.	Can be hidden almost anywhere in the room, while the sound seems to come from the cube speakers. Delivers a reproduction of pure, deep low notes without audible distortion.
Bose® Videostage® 5 decoding and post-processing circuitry	Delivers a five-channel speaker performance regardless of the listening material.	Enables listening material including DVD, CD, VHS and even mono recordings to be played with many of the benefits of surround sound.
Bose® link multi-room expansion with dual-stream audio	Allows seamless hookup to Bose® speaker solutions and systems for homewide options.	Lets you enjoy music throughout your home - even outdoors.
Aspect ratio control	Allows the customer to easily adjust the picture to properly fill the television screen.	While TVs can manipulate image shapes, they often don't do it for HDMI sources. The Lifestyle® V30 system allows the customer to change the aspect ratio for all HDMI sources to best suit their tastes and equipment.
Source-specific settings	Remembers desired image shape based on the input selected.	Customers do not need to make adjustments to the video every time they switch sources. The TV will display the VCR source the same way every time it is selected.
