

We are proud of the recognition ASKO appliances have and are receiving. We are honored to be considered by many as the benchmark for performance and resource conservation.

Of course, the greatest awards we receive are those won on the showroom floor, when somebody picks our appliances over somebody else's. And the fact that ASKO continues to grow at a record pace confirms that more and more people understand the value of investing in quality appliances.

Industry Standards & Environmental Awards

ASKO is proud that all of our clothes washers & dishwashers have earned the [ENERGY STAR](#) label.
