

KitchenAid® Hot Water Dispenser

PRODUCT MODEL NUMBER

KHWC160P
KHWG160P
KHWL160P

Electrical: A 120-volt, 60-Hz, AC-only 15- or 20-amp fused, grounded electrical supply is required. It is recommended that a separate circuit serving only your hot water dispenser be provided. Use an outlet that cannot be turned on/off by a switch.

Water supply requirements: If local codes permit, the hot water dispenser feed line should be connected to the cold water supply line using a saddle valve or another means for providing a 1/4" tube to connect to the dispenser. If a saddle valve is used, do not use a piercing type or 3/16" saddle valve, which reduces water flow and clogs more easily.

IMPORTANT: If local codes do not permit the use of saddle valves, special feed valves can be obtained from your local plumbing supply distributor.
