

**ASKO** ULTRACARE LAUNDRY SOLUTIONS

SOLUTIONS FOR YOU.

In Sweden, where we design and build our ASKO appliances, we're problem solvers. We work hard to find solutions to life's everyday challenges – and our laundry systems prove it. Every feature, every design element, every aspect of their performance has been refined with the single-minded purpose of making life simpler. From their sleek, purposeful styling and energy-efficient performance to their legendary durability and world-class warranty, ASKO laundry systems make life easier for you, for your family and for the Earth.

In Sweden, that's simply the way we do things – we solve problems.

# UltraCare Laundry Solutions

No matter what life throws at you, ASKO has the perfect UltraCare system to make short work of your laundry. From the high-efficiency, high-performance UltraCare Family to the supersized UltraCare XXL workhorse, ASKO has the right-sized laundry system for any family, large or small.

Perhaps you want a truly functional, truly beautiful laundry room with your appliances built into your cabinetry and complete with countertops? UltraCare washers and dryers are available with plenty of features to configure your perfect laundry room. Maybe you want to conceal your appliances? The UltraCare Integrated system with custom cabinet fronts blends right into your cabinetry. You can choose from wood, white or black, or you can opt for our TouchProof™ stainless steel panels that will complement virtually any room.

If you need an extreme space-saving solution, the UltraCare InOne system combines a washer and dryer in one standard-sized appliance.

If you have a large home, you may want to install multiple laundry centers. You'll love the flexible installation options of ASKO UltraCare Laundry Solutions.

If that weren't enough, the UltraCare Drying Cabinet, Cold Iron and HiddenHelpers all make life easier by solving some of the most nagging laundry issues.

Got laundry problems? Simple. Solve them with an ASKO UltraCare Laundry Solution.

DD

Folded towels on the left cabinet shelf.

Stack of folded towels and a yellow detergent bottle on the countertop.

Glass jar containing clothespins on the countertop.

Washing machine control panel with a red indicator light.

Dryer control panel with a digital display and several buttons.

Ventilation grilles on the bottom of the washing machine.

Small square panel on the bottom of the dryer.

# UltraCare Family Laundry System

The ASKO UltraCare Family Laundry System makes life better by simply working better.

For starters, UltraCare Family washers treat your clothes with TLC – even items labeled for hand-washing. However, don't let this gentle action fool you. UltraCare Family washers provide superior cleaning performance and a complete range of temperature settings from cold to 205° to get your family's clothes ultra-clean and looking new longer – and without one drop of harsh chlorine bleach. When it comes to the rinse cycle, many washers fail to remove all detergent residues. Not so with UltraCare Family washers – with a unique seven-rinse process, they remove all traces of detergent, making them a welcome addition for family members with allergies or sensitive skin.

Our solutions extend beyond the laundry room, providing tremendous environmental benefits as well as fresh, clean clothes. ENERGY STAR qualified UltraCare Family washers are some of the world's most efficient, getting your clothes clean and fresh with less detergent, less water and less electricity. With a spin speed of up to 2000 rpm, they extract more moisture than other washers, which makes the drying process more energy-efficient.

With the simple and sophisticated EasyControl™ technology, you manage the high performance of your UltraCare Family washer and dryer by simply pressing a few buttons.

Thanks to its Butterfly Drying System™, the ASKO UltraCare Family dryer tumbles clothes in a figure-eight instead of just round and round in a circle. This keeps clothes from bundling and creasing and reduces your need for ironing. Precisely tuned temperature and moisture sensors work together to end the drying cycle at just the right time. This prevents overdrying, which can wrinkle, shrink and even damage your family's clothing.

No matter where you choose to install your UltraCare Family Laundry System, it's going to look great – with a variety of finishes, white, black, titanium and TouchProof™ stainless, to match any room in your home.

With less hand-washing, less ironing, less wear on your clothes, less impact on the environment, less complicated programming – and more performance – the ASKO UltraCare Family Laundry System is, in the simplest terms, the laundry solution for simpler living.

# UltraCare Fully Integrated Laundry System

Now, ASKO gives you a wonderful way to simplify the look of your laundry room or to install laundry appliances in a different room altogether – thanks to the world’s only fully integrated laundry system. With the UltraCare Fully Integrated Laundry System, the fronts of your UltraCare washer and dryer come prepared for your cabinetmaker to easily install wooden panels that match your other cabinetry. Or if you choose a finish other than wood, your UltraCare Integrated Laundry System is available with white, black or TouchProof™ stainless steel panels. Custom-matched to your room, the Fully Integrated Laundry System can be concealed virtually anywhere in your home – the bathroom, bedroom, mudroom or kitchen. Because of the optional ventless dryer design, you can install your UltraCare Fully Integrated System wherever it makes your life easiest.

Speaking of making life easy, the UltraCare Fully Integrated Laundry System is not just another pretty face. It’s packed with the same advanced features and hard-working performance as the UltraCare Family Laundry System, so it makes doing the laundry a snap. All this performance is under your command with the sophisticated, easy-to-use LineConcept™ control system with left-to-right logic and intuitive LCD displays that seem to program your washer and dryer for you.

Did you ever imagine that laundry could be so beautiful, so simple, so simply beautiful?

At ASKO, we wouldn’t have it any other way. Problem solved.

# UltraCare XXL Laundry System

Do you suffer from Big Laundry? You know – load after load after load – the kind of laundry that never ends?

Finally, Big Laundry has met its match. The ultra-high capacity of the ASKO UltraCare XXL Laundry System will help you do fewer loads every week. Built to gently clean the most delicate items and still tackle the toughest stains, the UltraCare XXL Washer has 5 temperature settings – from cold to extra-hot – and 5 soil level settings. Likewise, the UltraCare XXL Dryer features 5 dryness levels and 5 temperature settings in addition to anti-crease capability, delay start and more.

In spite of all the features packed into the UltraCare XXL Laundry System, both the washer and the dryer are incredibly easy to use. With EasyControl™ LineConcept programming and a clear LED display, operation is a snap. For the perfect laundry performance for each load, you simply choose from among 10 different programs on each unit.

Full of additional solutions, the ASKO UltraCare XXL Laundry System is available with an exclusive reversible washer door, an optional pedestal with built-in drawer and your choice of electric or gas dryers. In other words, it's the simple way to finally put an end to Big Laundry.

# UltraCare Drying Systems

ASKO offers a complete range of drying solutions from traditional vented dryers to condenser-equipped, ventless dryers to an incredible appliance, the UltraCare Drying Cabinet.

UltraCare vented dryers use traditional exhaust venting systems but are otherwise anything but traditional. With state-of-the-art technology, easy-to-operate controls, precise moisture sensors, wrinkle-reducing features and more, UltraCare vented dryers are some of the world's most advanced.

Thanks to a unique, built-in condenser, ASKO UltraCare ventless dryers require no external exhaust or ductwork. This non-venting, ductless design means easier, less expensive installation virtually anywhere in your home. In fact, rooms that were never able to accommodate a dryer before can have an UltraCare ventless dryer. With no external exhaust or ductwork, your home will be more airtight for more efficient heating and cooling.

An ingenious solution for almost any home, the UltraCare Drying Cabinet gently dries items that shouldn't go into a traditional tumble dryer – knit sweaters, fine shirts, delicates, even umbrellas.

Consider all the rainy and snowy days when you need to dry your kids' clothes. What about special care instructions such as “dry flat” or “hang to dry?” The UltraCare Drying Cabinet solves all of these problems. Tucked away in this energy-efficient cabinet, wet gloves, hats, shoes, boots, sweaters, silks and other delicates will be dry in no time – and your home will stay nice and neat.

# UltraCare InOne Laundry System

Perfect for homes without the space for a washer and dryer, this hardworking appliance does the job of both. And with loads of features and automatic transition from the wash cycle to the dry cycle, the ASKO UltraCare InOne Laundry System takes nearly all the work out of doing the laundry.

Installation is simple and inexpensive. Thanks to an internal moisture condenser, the UltraCare InOne does not require ductwork or an exterior vent for the dryer exhaust. Combined with the unit's space-saving design, the no-hassle installation makes it ideal for apartments and townhomes. Just hook up the water connection and plug it into a regular 110V outlet. That's all there is to it.

## UltraCare Cold Iron

In the past, freshly pressed sheets, tablecloths and drapes were a luxury reserved for fine restaurants and hotels. Not any longer. The ASKO UltraCare Cold Iron takes all the work out of pressing “difficult-to-iron” linens.

Pressed linens not only feel and look great; they collect up to 60 times less dust. To enhance the lives of people with allergies, asthma and other respiratory concerns, the ASKO UltraCare Cold Iron improves indoor air quality.

The UltraCare Cold Iron – a solution for better health, for a more luxurious home and, better yet, for a simpler life.

# UltraCare HiddenHelpers™

Neatly out of sight but ready to assist with storage, folding and ironing, you'll find optional, time-saving tools called HiddenHelpers, little conveniences that make life so easy you'll never want to do without them. Designed to make doing your laundry as fast, simple and organized as possible, ASKO UltraCare HiddenHelpers include space-saving features such as a concealed, removable basket, a handy ironing board, pull-out shelves for sorting and folding clothes and pedestals for easy loading and unloading.

Available for the UltraCare XXL System, the pedestal includes a storage drawer. Located under the washer, it's the ideal hiding spot for detergents, fabric softeners, coat hangers and other clutter. Elevating the washer, this pedestal/drawer combination simplifies loading and unloading your clothes.

Outfitted with practical features like these HiddenHelpers, your UltraCare Laundry System takes much of the work out of laundering your family's clothes.
