futurePRNT**

- Ships complete - all accessories and software are included in the box.
- “Error Reporting Feature” which indicates a lost network connection by “error” lights
- “Real Time Status” alerts

TSP100LAN - It's All In One Box

Finally an easy way to connect to your network.

Again, a first in the POS industry: A dedicated Ethernet printer, the TSP100LAN, the latest addition to the TSP100 futurePRNT family. The TSP100LAN brings all the attributes of the TSP100 including all parts and software being included in one box coupled with Ethernet connectivity! Now you can easily connect the TSP100 to your network.

Ethernet is the interface that everyone dreams of. The advantages are incredible:

- Distance: A printer can be connected as far as 300ft away from a PC
- Connectivity: No limitation to the number of printers on the network & cables have lockable connectors
- Communication: Do not limit your hardware speed, get your printer to run on today's high-speed network
- Reliability: Printer is connected to the network not the PC. If one PC on the network is down, the printer will still work with other networked PCs
- Mobility: Ethernet Printers can be moved on the network without any re-setting

And The TSP100LAN brings you even more....

The TSP100LAN printer includes an “Error Reporting Feature” which indicates if there has been a lost network connection by flashing its “error” lights. The “ready” button not only tells the user that the printer is on, but also if it has paper and if it is operating correctly. It will also now tell the user if it has a “real” connection to the host computer.

The TSP100LAN also features “Real Time Status” alerts for the cover being open or paper being out. Now, due to the TSP100LANs connectivity, any PC on the network will be able to see the status of the printer.

Always Leading - Always Innovating

The Complete POS Solution!		
<h2>Features</h2>	Hardware <ul style="list-style-type: none"> - Ultra Fast (125mm/s) - All in ONE Box (All accessories needed are included with the printer) - "Drop-In & Print" Clamshell Design - Reliable Guillotine Cutter - Durable Enclosure Design - Small Footprint - WHQL Certificated - Embedded Power Supply - Two Color Print Capable - Horizontal & Vertical Use - Recessed Cable Connections - ESC/POS™ emulation supported 	Software <ul style="list-style-type: none"> - Add images (Logos, Coupons, Merge Images, and more!) - Enhance barcodes - Add key words to trigger coupons or vouchers - Replace text - Create a Virtual Serial port for legacy applications - Keep an electronic record of all transactions - Preview your receipt design before printing to avoid wasting paper
