The Natural Choice in Prenatal Nutrition

Nutrition Before, During and After Pregnancy

Pregnancy Plus[®] Prenatal Vitamins provide a once-daily spectrum of essential vitamins and minerals for both mother and baby. This complete multivitamin supplement includes key nutrients like iron, vitamin C, vitamin A (as beta-carotene), and folic acid - important in preventing birth defects. It also provides antioxidant support to cleanse the body of oxidizing free radicals and promote optimum pregnancy health.

Correct dosage and quality of ingredients in a prenatal supplement are especially important. Pregnancy Plus[®] Prenatal was developed by leading ObGyn, Dr. Amos Grunebaum, based on his "Just Right" formula for optimal prenatal and baby health. Pregnancy Plus[®] Prenatal is all-natural with no additives or preservatives, and guaranteed for quality and potency.

"Ensure you're getting the nutrients you and your baby need with the Pregnancy Plus[®] Prenatal formula." - Dr. Amos Grunebaum, ObGyn

Hear what others are saying about Pregnancy Plus[®] Prenatal:

"This is a great pill if you have a hard time swallowing the horse-pill sized vitamins. Finding this product was a great solution for me - especially during the first several weeks when I had morning sickness." - Andrea

"I took these while I was pregnant with my son, now 22 months. They were great because you only have to take one, they're small and easy to swallow, and best of all they have all natural ingredients. All of the other all natural vitamins out there you either have to take like 6 of them a day, or they're huge! I took them throughout my whole pregnancy and had a very healthy, 7 lb, 13 oz. son." - Maria
