

PREPSTER™

Abrasive Skin Prep Pad

PREPSTER is a specially formulated abrasive skin prep pad made from FDA compliant material

Use **PREPSTER** to safely, gently and thoroughly abrade patient skin prior to electrode application

Exfoliating the skin has been shown to dramatically improve all kinds of test readings

PREPSTER produces no mess, leaves no gritty residue

"Artifact in ECG monitoring can be annoying, costly and dangerous."

"Gentle abrasion...removes the unwanted, nonconductive dead cells, with minimal skin damage or irritation... five to ten gentle strokes can effectively decrease impedance..."

"Improvement in electrode preparation techniques and a better understanding of the sources of artifact can enhance equipment performance, resulting in improved patient assessment, more effective utilization of nursing time, and reduced operating costs."

— *Critical Care Nurse*, M. Smith, 1984: 4: 64-66

"It's Time to Stop Using Sandpaper and Commercial 'Scrubber' Pads on Patient Skin"
