1. Cut tape around box and remove contents from package.

2. The Revolver will be in six parts: Seat assembly, head rest and four legs. Arrange them in front of you for easy assembly.

3. Raise the backrest to an upright position. Lower the headrest down and insert the backrest support tubing into the seat's upper support tubing until the headrest snaps into place.

4. Place the Revolver shower seat on its side and fold out the legs. Insert the legs into the lower seat tubing assembly. The legs will snap into place. The leg height can be adjusted by pressing in on the spring loaded gold button and adjusted accordingly. Repeat the process to the remaining three legs on the Revolver. Remove any plastic wrapping still on the Revolver.
The Revolver shower seat is now ready to be placed in a standard bath or shower. A client can be transferred into the shower chair by using the following steps:

**Placing the client in the Revolver shower seat:**

1. Adjust the height of the shower seat to the desired position for client comfort. This can be done by pressing the gold colored button on the leg of the shower seat and raising or lowering the leg base. Place the shower seat into the tub or shower.

2. Raise the armrest on the Revolver shower seat by pushing in on the red release button located on the front lower side of the armrest and swing the armrest to its most upright position.

3. Sit the client down on to the Revolver shower seat so that they are centered on the seat.

4. If using in a bath tub, gently raise the client’s legs and pivot them over the side of the tub. The Revolver shower seat has an integrated swivel mechanism that will assist the caregiver in rotating the client over the tub wall with minimal effort.

5. Lower the armrest down until it clicks into a secured position. This will provide extra support and stability for the client during hygiene care.

**Removing the client from the Revolver shower seat:**

1. Raise the armrest on the Revolver shower seat by pushing the red release button located on the front lower side of the armrest and swing the armrest to its most upright position.

2. If using a bath tub, gently raise the client's legs and pivot them over the side of the tub and help them to desired position.

**Cleaning Instructions:**

The Revolver shower seat is very durable and easy to clean. The shower seat can be disinfected by spraying it with any standard non-abrasive hospital grade hard surface disinfectant. Gently wipe the disinfectant into the surface using a soft towel or cloth and let sit for 10 minutes. Then rinse the shower seat to make sure all disinfectant has been removed.
