E 8/0

A great overall thread, that is twice as strong as UNI's & Gudebrod's 8/0. The breaking strength is above 1kg!

Strength for 8/0 - in Grams

COLOR CODES:

8V11 (E01)

8V377 (E02)

8V323 (E03)

8V310 (E04)

8V271 (E08)

8V206 (E09)

8V369 (E12)

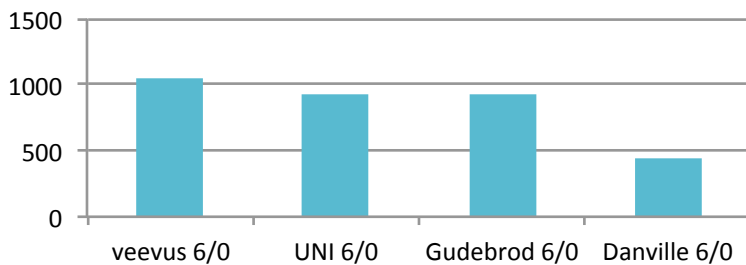

8V263 (E14)

F 6/0

The 6/0 is perfect for streamers, pike or saltwater flies and other flies where you require inserting bigger materials! The thread is two-strand which makes splitting the thread to insert dubbing very easy & fast. Just unwind it a bit, give it some slack and it opens up on its own. The breaking strength is above 1kg!

Strength for 6/0 - in Grams

6V323 (F03)

6V310 (F04)

6V289 (F08)

6V347 (F9)

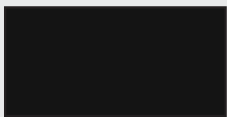

6V206 (F10)

G

The G.S.P (Gel Spun Polyethylene) is by far the strongest thread on the planet after our Veevus thread. In difference to other brands the Veevus G.S.P. thread has been designed with a slight twist preventing it from opening up, and thereby making tying with it a breeze. It lays completely flat and is the smoothest thread to spin hair with. It is currently available in 2 colors (more colors coming soon) in the following sizes, **200Denier**, **150Denier** and **100Denier**. Also Veevus is the first to offer a **30Denier** GSP(This size is available in white only). Each spool contains 75m which is **67% more** thread than offered by anyone else in our industry.

Hareline

This stuff takes thread bodied flies to a whole new level. But wait there's more, what if the fly, say a Clouser had this thread tied in at the head? Or what if it was furled and used as an extended body? What about ribbing? Terrestrials? The list goes on. Available in 10 different colors. Spool size is 30m.

M

It's construction is a cross between a floss and a thread which means it can also be used for tags, tails, hot-spots, wings and heads. It is easily twisted tight or loose and split to insert whatever dubbing-type material you might want to bind down.
