

# ScrollSander Sanding Belts

ScrollSander sanding belts easily smooth the edges of scroll saw projects in wood, plastic, metal, and composites. These durable, fabric-backed belts have molded polycarbonate ends for attaching to most scroll saws that take 5" blades. ScrollSander belts rapidly remove bumps, burns, and feathering, and correct wandering from a cutting line. They also work great on curves, concave or convex edges, and can reach into intersections.

ScrollSander belts come with pin and plain ends in 1/4" and 1/2" widths in a choice of 80, 120, 180 and 220 grits.

Mount Scroll Sander belts as easily as a blade. Remount with opposite side up to extend the life of ScrollSanders.

NOW from  
**OLSON®**

Sand convex or concave edges

Reach into intersections

Correct wandering from a cutting line

Remove bumps, burns, and feathering

Packaged to sell with Olson Scroll Saw Blades

## Recommendations:

Fits most 5" scroll saws (Craftsman®, Delta®, DeWalt®, Excalibur®, Ryobi®), but modifications may be required to throat insert or table opening depending upon width of sander used. Be sure to check your table/ throat plate opening before purchasing sanders. DeWalt® & Excalibur® Scroll Saws only accept the 1/4" sanders unless you drill the table hole larger.

Dremel® 1670, 1671 & 1680: use pin end sanders. Remove nub of plastic at gate to fit into clamp, if necessary.  
Delta®: use side mount, cut table insert to fit sander, or remove table insert.  
Ryobi® SC 160: use pin end sanders.  
Ryobi® SC 162, 162VS & 165: use plain end sanders only.  
Hegner®: use pin end sanders.

Does not fit RBL®, Reliant®, or Moto-Shop®.  
Plain end sanders fit most conversion kits for mounting blades with plain ends on pin end saws.
