Hydrosols
For Face & Body
Hydrosols are aqueous solutions created when essential oils are steam distilled from plant material. They have a delicate scent and a myriad of functions — used as a cooling, refreshing mist for face or body, a fragrance spray or to add moisture to the skin when applying creams, lotions or oils. They are toning as well as hydrating and can be used on oily skin as a light moisturizer.

Plants used in these products are grown in small, hand-tended plots.

Works great in any room as an alternative to overly heavy air fresheners. Use to freshen pillows or clothing; since it is water based, it leaves no stain. Does not contain alcohol.

*No charge for scenting this product with your choice of perfume oil. May also be scented with an essential oil or an essential oil blend (charges apply).

We wanted to sell perfumes and mix them like they did in France. Our friend the chemist said, ‘Don’t limit yourselves,’ so we included soaps, lotions, shampoos and bubble baths. We didn’t have any money so we bought cheap plastic bottles, filled them from gallon jugs, sold by the ounce, refilled products, hand wrote labels, cut and wrapped the soap from slabs and scented any unscented product with a variety of perfume oils. That’s how it was.”

I’ve been in and around Body Time my whole life. Not only because my grandmother, Manda, owns the company, but because my mother worked there as a copywriter when I was younger. We’ve always had the products in our home, but the first one I began using regularly is the Anti-Inflammatory Facial Treatment. I don’t have acne, but I hoped that the serum would cure my occasional zits. The serum worked faster than expected! Not only did it cure any zits I had, but I stopped getting zits to begin with. I really do think that this treatment is one of the best that you can find.

Try Our Organic Hand Made Wool Puffs!

HOW THE HANDCRAFTED WOOL PUFFS ARE MADE
Using sheared wool fleece from two ranches in northern California, in its natural state, I begin by pulling off strands of wool fiber which I then separate, straighten and stack into small bundles. I hold the bundles together by placing a clip at one end. Each bundle is then hand washed in soap, hand rinsed, and hung to dry. I retie the dry powder puffs with wool yarn and card them to bring up the nap. Lastly, I shape the puffs with scissors to give them their smooth, soft surface.

Dusting Powder, Puffs and Refillable Containers
For After Bath and Shower
For a soft and silky feeling, apply this mild, non-irritating, unscented, all natural blend of cornstarch and baking soda following bathing. Makes an excellent natural deodorant or use as a foot or baby powder or for massage. Have us custom scent this with your choice of perfume oil (see page 4) or essential oil(s). Does not contain talc. Our powder puffs are handmade from natural, unbleached wool from two different ranches in California. They are extremely soft on the skin and make applying powder a sensual delight! We also offer a simple flat pad. Our old-fashioned, enameled tin powder box comes in red.

China Rain Liquid Powder
A Body Smoother for Silky, Fragranced Skin For All Skin Types
As the name suggests, this lotion-like body smoother glides on and dries instantly, leaving the skin silky soft and highly fragranced. Ideal for after bath to cool the skin while absorbing moisture. Wonderful for absorbing perspiration in hot weather. Enriched with natural tapioca, apricot kernel oil and coconut oil along with the humectant glycerin to give the skin a powdery and moisturized feel.

- L07304 • 4 oz. $12.50
Spray-On Natural Body Moisturizer
For Dry Skin
This unique, highly concentrated spray-on lotion dries quickly and remains an active humectant until you wash it away. All-natural formula simply composed of water, vegetable glycerin, grapefruit seed extract and pure lavender essential oil. You want natural, here it is! An ideal moisturizer for dry mountain regions. Can be custom scented on top of existing scent.
Although the Spray-On is a great moisturizer for dry and very dry climates it also works well in somewhat humid climates like the Bay Area. After a shower or bath, while still damp, spray on arms, legs, and back. Just a quick wipe with your hands sets it (no rubbing in as you would with a lotion moisturizer). A friend of mine sprays it on while still in the shower while still wet, before she uses the towel.

Lavender Tea Tree Spray-On Deodorant
This is a highly effective yet natural deodorant, which utilizes botanicals and minerals to inhibit odor caused by perspiration. The liquefied aluminum potassium effectively controls the growth of bacteria that leads to underarm odor. We’ve added a clean, fresh pure essential oil blend as well as aromatic hydrosols that act as antibacterials and impart a gender-neutral scent. We now have an 8 oz. refill to replenish your 2 oz. bottle.

Deep Water Bath
After a tough day, you decide to take a deep, relaxing bath. You’ve added some delicious bath salts and the tub is full with really hot water. The only thing that can ruin the experience is the one thing you forgot about — the overflow drain! The minute you get into the tub, the water level rises above the overflow drain and within minutes you’re barely submerged. The Deep Water Bath simply and ingeniously solves this problem by suctioning onto your tub and encasing the overflow drain, allowing for a much deeper bath — up to 6 more inches! Does not fit all tubs.

Ultra Absorbent Hair Turban or Hair Towel
These items have become a staple in our stores. Made of super absorbent material that removes water from wet hair in no time at all, making hair ready for gel application or blow-drying. Normally, towel drying the hair is rough and awkward while our Turban or Hair Towel is gentle and easy to use. The pre-shaped Turban simply twists around the hair and loops onto a button, keeping it securely out of your face. Ideal for short to shoulder length hair. The Hair Towel is perfect for thick, long hair.

F0382 • Towel $22.00

A few months ago I had a Mastectomy/Chemo/Radiation... my upper body was burned so that I had scabs in places. I needed a spray and not a cream — I did not want to touch my body. This product is the best thing that has happened to me in a long time — I LOVE it!!!! My scabs have fallen off and I am on the mend, both physically/mentally and spiritually. I highly recommend this product to ANY breast cancer patient. It is natural and you just can’t improve on the hope it gives you.

Why pay more for these shampoos? What makes them different from others on the market?

Mild cleansing agents, essential fatty acids and beautiful aromatic blends of pure essential oils set these two shampoos apart from their more commercially produced counterparts. Most shampoos on the market strip your hair and scalp of their natural condition (or mantle) so much that you need to put it back with conditioners. Not so with these unique shampoos — with continual use, you’ll find that your hair comes alive, back to its true nature. They are gentle enough to use everyday and you’ll find that you need to use conditioners less often. It takes two weeks of continual use for your scalp and hair to respond to these gentle cleansing agents and essential fatty acids.

Use daily or as needed.

When we polled our customers, the following products turned out to be your favorites. Over the years our best sellers change, but our China Rain Perfume still sits at the top of the list. We are delighted to see a significant number of our Aromatherapy Botanical Line represented here as well — if you still haven’t tried them, ask for a sample. We think you’ll see what all the fuss is about!
