Los Angeles, CA ([PRWEB](#)) January 19, 2010 -- Biocide Systems' recently announced a twenty percent per month increase in autoVACCINE sales from last year, driven by customer satisfaction and the effectiveness of the product guaranteed to eliminate odors in vehicles.

“The great thing about autoVACCINE is that it is such a versatile product,” said Juan Carlos Baselli, CEO of Biocide Systems “Not only does it remove the smell of mildew it also removes smoke and pet’s odors, while creating a clean and sterile environment for our customers and their families.”

The non-toxic, chlorine dioxide vapors released by Biocide System’s products move through the air and penetrate porous surfaces including car fabrics, leathers and vinyl.

“I acquired a car from the original owner 5 years ago. I know she was a chain smoker and the car smelled of heavy smoke all in the upholstery, air vents and everywhere” said Biocide Systems customer Art Norman.

Norman, a marketing manager for Manheim Auto Actions, Calif., tried everything to get the smell out his car. Everything from air fresheners to Febreze products failed him.

“Then I got a hold of the autoVACCINE and decided to give it try since it was so affordable,” he said. “When all was said and done, my car no longer smelled of smoke. It was miraculous! It is the best and most cost effective solution I have ever seen for removing unwanted odors from vehicles.”

Biocide Systems' autoVACCINE can be purchased online at [BiocideSystems.com](#). Originally priced at \$24.95, autoVACCINE and Biocide System’s RoomSHOCKER are on sale for \$14.95 until Jan. 24. Both formulas are available with a 100 percent money back guarantee. Biocide Systems’ RoomSHOCKER is guaranteed to eliminate stale and musty odors while disinfecting and completely deodorizing any room.
