**Keeping Your Lenses and Electronics Clean with The "GREEN" LenSmart Cloth**

*OSN digital Developes Innovative Canister with Microfiber Cleaning Cloth*

STONE MOUNTAIN, GA, June 18, 2009 **/24-7PressRelease/** -- **OSN digital**, a leading manufacturer and supplier of high-quality digital camera accessories and tripods, introduces an exciting new product for the digital and electronics market, its revolutionary new patent pending [LenSmart Cloth](#). With a uniquely designed protective shell, the container offers weather resistant qualities and quick and easy accessibility, thereby keeping the LenSmart Cloth™ clean and pristine and readily available when needed. With its LenSmart Cloth, OSN digital has created an environmentally friendly alternative to standard lens and glass cleaners and Microfiber cleaning cloths currently on the market while still maintaining increased practicality and ease of use.

Featuring a container that can be customized, the LenSmart Cloth with protective container is versatile for multiple market segments. With its compact design and nylon hook, the LenSmart Cloth with protective container can be easily attached to a keychain, belt loop, camera bag, or purse for quick and convenient access and use. Made from combinations of polypropylene and rubber, the LenSmart Cloth with protective container and lid is a step above its competitors with its weather resistant qualities. When closed, the protective container eliminates the unintentional transfer of moisture, dirt, and contaminants to the LenSmart Cloth.

The LenSmart Cloth is perfect for cleaning dirt and oils from eyeglasses, camera lenses and LCD screens, cell phones, iPods, GPS screens, binoculars, and many other smooth scratch sensitive surfaces. Constructed of a Microfiber blend of nylon and polyester, grease and dirt are quickly and effectively trapped and lifted off of surfaces without streaks or scratches. Polyester has an attraction to both grease and oils, which will attach directly to the polyester fibers, and nylon has an attraction to water, keeping your delicate lens or scratch sensitive surface free of moisture. The combination of the LenSmart Cloth and its protective container provides the key for maintaining a clean and pristine cloth that can be safely used when needed.

The LenSmart Cloth with protective container is also an environmentally friendly product. Since it is used dry, the need for chemical solvents is eliminated. Furthermore, the LenSmart cloth can be laundered up to 400 times with reduced frequency due to the protective LenSmart Container, thereby eliminating the need for single use paper towels and tissues.

The **OSN LenSmart Cloth** with protective container is just one of an innovative line of products offered by **OSN digital**. For more information about this or any other [OSN digital](#) products, contact Kelly Breyemeier at One Source Network, Inc. by phone at (888) 381-2390 or by email at [Kelly@osnusa.com](mailto:kelly@osnusa.com) or visit the website at [www.osnusa.net](http://www.osnusa.net).
