OSN Lights Up the Photographic Market

-- OSN , a leading manufacturer and supplier of high-quality photographic and digital camera accessories and tripods, has introduced a new line of lighting products and accessories to the photographic and digital market. --

STONE MOUNTAIN, GA, November 19, 2008 **/24-7PressRelease/** -- In its tradition of quality and innovative products at reasonable prices, OSN has created a range of sturdy products that can be quickly and easily set-up, adjusted, and collapsed, thereby eliminating the hassle of much of the traditional lighting equipment. In addition, the lightweight construction allows for easy transport, and the compact nature of the products when collapsed allows for easy storage. With the release of this new line of lighting products, OSN is one step closer to its goal of providing customers with a complete set of practical solutions for capturing the perfect image.

THE OSN LIGHTING LINE

The OSN line of lighting products includes:

LS11: The LS11 is a deluxe light stand perfect for supporting reflectors and luminaries. Constructed of strong, yet lightweight aluminum, this product is ideal for both studio and location shoots. Its quick lever leg locks allow for easy set-up and height adjustments, and its 3/8" stud with 1/4" 20 threads make it compatible with most lighting accessories.

Specifications:

Maximum Extension: 78.5"

Minimum Operating Height: 31.5"

LS9: The LS9 table top light stand is a sturdy and versatile alternative to some of the larger, more cumbersome light stands on the market. The LS9 is constructed of strong, yet lightweight, aluminum and features include quick lever leg locks for easy set-up and height adjustments.

Specifications:

Maximum Extension: 26"

Minimum Operating Height: 15"

LSB6: The LSB6 light boom is constructed from strong, yet lightweight, aluminum. Equipped with a 3/8" stud with 1/4" 20 threads, this product is perfect for supporting reflectors and other luminaries. Additional features include a two section center column and quick lever leg locks.

Specifications:

Maximum Extension: 116.5"

Minimum Operating Height: 39.4"

LR10: This 10" photo floodlight continuous canister includes socket cord and hardware. Its universal mount is compatible with all light stands.

FB30: This 30 watt trumpet top bulb and 5400 K daylight fluorescent bulb features color reducing technology, thereby virtually eliminating the need for color correction.

LSBD9: The LSBD9 is a complete backdrop support system including two (2) spring cushioned, three

section stands, four (4) 36" crossbar sections, and one (1) 48" storage and carry case.

Heavy Duty Stands: These strong, yet lightweight, aluminum stands are constructed for easy portability. Featuring a three section center column with twist lever leg locks, these spring cushioned stands can reach a maximum height of 118.5". Additional specifications include a collapsed length of 47.25" and a 12 lb weight.

Crossbars: The four (4) 36" crossbar sections can be used in two, three, or four section combinations for a maximum length of 124".

Carry Case: Crafted in durable weather resistant outer fabric, this carry case is the perfect storage solution. Features include carry handles for easy transport, padded nylon interior for convenient storage and protection, and zippered access.

LB30: This photo box light tent is the ideal solution for controlling shadows and reflections. Measuring 30" x 30", the LB30 can accommodate items up to 24" tall. Light diffusion eliminates hot spots on products being photographed. With quick pop-up construction and easy removal or changing of the background, set-up is quick and easy. The photo box light tent collapses down to fit into a circular zippered carry bag, which is included with purchase.

LB20: This photo box light tent measures 20" x 20" and can accommodate items up to 16" tall. It is ideal for controlling shadows and reflections, and its light diffusion properties eliminate hot spots on products being photographed. With quick pop-up construction and easy removal or changing of the background, set-up is quick and easy.
