- *size: medium
- *weight: 1.88 lbs.
- *width: 9 inches

[OSN DC 23 camera/camcorder bag Review](#)

March 28, 2006

The OSN DC 23 large multi-pocket camera/camcorder bag is a real nice bag at a most reasonable price. The manner in which the bag is used differs from competing mid-size bags. First, the fully zippered top lifts up and hinges at the front edge, making it easier to access the contents while the bag is suspended from the shoulder. Two padded, movable dividers allow adjusting the interior to accommodate your equipment. It will easily hold an SLR with attached lens along with several extra lenses. At each end are larger-than-usual zippered pockets for mid-size items. A zippered flap on the front folds down to reveal a large shallow compartment for books, and there are many small flap pockets by the main compartment for pens, media cards, batteries, and similar needed accessories. A thick padded handle on the top and a removable, well-padded wide shoulder strap offer two ways of carrying this bag. A stiffened bottom has a rubber-like padded foot area for protection. Grey patterns on the front and ends provide styling accents. The zippers all have extra-long pull tabs and are very easy to operate. The bag appears to be well assembled for durability and long life.
