

**FOR IMMEDIATE RELEASE**

**OSN™ SPRINGS INTO PMA WITH NEW TRIPOD FEATURING RAPID  
RELEASE LEGS**

It's all about spring!! Spring release, that is. OSN™, a leading manufacturer and supplier of high-quality digital and photographic camera accessories and tripods, will debut its new tripod with rapid release legs at this year's PMA show in Orlando.

The company's new, patent-pending design allows the tripod to set-up with just a touch of a button! For quick and easy set-up, simply depress the release button on the tripod, and the spring loaded legs quickly extend. The maximum extension of the tripod is 5.5 inches.

The lightweight, yet sturdy tripod is constructed of industrial grade resin. It is also equipped with non-slip rubber feet and an adjustable ball socket head for easy camera set-up and alignment. The tripod's unique design also features a convenient switch able LED light attached to the base of the center column, for use in locating items in your camera case, or for added visibility. The compact design of the OSN tripod with rapid release legs makes it perfect for storage in a camera case.
