Telescent Releases First Catalog of Fiber Optic Interconnect Products Designed Specifically for Enterprise Networks

Santa Monica, California, April 12, 2007--Telescent has introduced its Summer 2007 catalog featuring fiber interconnect solutions that simplify the installation and maintenance of fiber optic systems while also reducing operational costs and network downtime.

Telescent's complete product line includes SureLink™ retractable fiber patchcords, wall mount mini-enclosures and SureConnect™ protective union adapters. The unique functionality of these products makes the transition from copper-based to fiber-based communication systems simple and worry-free. These products are based on innovative and patent pending fiber optic technologies developed with the needs of enterprise networks in mind.

The 2007 catalog is available for immediate download at www.telescent.com and our products can be ordered directly from Telescent's online store.

About Telescent:

Telescent engineers and manufactures high performance fiber optic connectivity products designed for simplicity, reliability and ease-of-use. These solutions are tailored to meet the needs of customers who are deploying fiber optic networking systems within commercial, industrial and government facilities . . . even within residences.
