Press Release

Introducing the New Face2Face F(uji) 1 System – Half the Cameras, Twice the Speed!

January 21, 2010, Moss Beach, California.

Abalone LLC is pleased to announce a new upgrade to Face2Face, the Face2Face F (for Fuji) 1, available immediately for the same price as before! (It is a free software upgrade for existing customers).

The new system uses a single, imported Fuji Finepix W1 stereo camera to take the dual images required to create the 3D heads.

The new camera eliminates the need for all of the hardware of the earlier system, such as the stereo-bar, the USB hub, the remote control, back-picture, thus making the system much more portable and easier to set up. Most significantly, the new system reduces the former 2-3 minute processing time to about 1-1.5 minutes in most cases. No more waiting for the process to finish!

“We are very pleased to offer this new system – said Laslo Vespremi, Abalone LLC CEO. Not only is this a much more elegant solution but given the reduced setup time and the increased speed, this makes it a far more ideal tool for class demonstrations and field trips. Best of all, we can offer this software upgrade free of charge to all our existing customers (although they need to purchase the new camera either through the internet or via www.abalonellc.com)”

Face2Face software runs on Windows XP, Vista and W7 computers, comes with unlimited tech support and upgrades. The software is fully automatic - with a single click the head is created. Buttons allow to view and print the 6 month, 1 year and 3 year images.

Face2Face (with Fuji camera, software) sells for \$3,795. More info: www.abaloneLLC.com

Abalone LLC is located in Moss Beach, California.
