

How to Make Your Sequin Flowers

1. Select five acetate petals per flower.
2. Select which color and size sequins you want to use. You can refer to the picture on the package for design ideas.
3. Peel the paper backing off of the first acetate. Stick your sequins onto the sticky side so that they touch, side to side. You should cover the entire surface of the acetate so that it's completely covered. Do not cover the hole. (Figure 1)
4. Repeat for all five petals.
5. Locate two green pipe cleaners and one plastic stick.
6. Put the end of one pipe cleaner through each hole in the petals, sequins facing up, and arrange petals into a flower shape. About 1/2" of the pipe cleaner should be showing through the top (figure 2). Twist pipe cleaner so that it lies in a small flat, round circle at the top of the flower. (figure 3).
7. Twist the pipe cleaner below the flower so that it holds the flowers in place. (figure 4)
8. Position the stick under the flower and wrap the rest of the pipe cleaner around the stick. Use two pipe cleaners to cover the stick, and twist two leaf shapes about two inches below the flower (figure 5).
9. Glue a large rhinestone to the pipe cleaner at the top, center of the flower (figure 6).

Flower Design Suggestions:

You can mix petals to create custom designed flowers, or use all the same petals on a flower. We encourage you to be creative and choose your own colors. There is no right or wrong way to make Sequin Flowers, they are all beautiful!

- Flower A:** 5 petals of peel and stick acetate (small round petals). Each petal has approximately 24 flat medium sequins of one color and 7 flat medium sequins of another color.
- Flower B:** 5 petals of peel and stick acetate (large elongated petals): Each petal has approximately 16 flat medium sequins of one color and 16 flat medium sequins of another color.
- Flower C:** 5 petals of peel and stick acetate (heart shaped petals): Each petal has approximately 13 large flat sequins of one color and 11 medium flat sequins of another color.
- Flower D:** 5 petals of peel and stick acetate (small thin shaped petals): Each petal has approximately 24 medium flat sequins of one or more colors.

Arrange Flowers in Your Flower Pot:

1. Locate your flower pot, foam, extra sequins and glue.
2. Snap together the two sides of the flower pot.
3. Put your foam in the base of the flower pot.
4. Put your flower stems into the foam.
5. Glue some sequins to the outside of your flower pot. (Figure 7)

Helpful Hints:

1. Press sequins firmly onto sticky side of acetate. If a sequin falls off, you can use a drop of glue to secure it.
2. Be creative and select your own color and style combinations!

Ages 6 and up

Conforms to ASTM-D4236

Sequin Flowers™

No. 4678

We hope you enjoy your Sequin Flowers™ kit. If you find that we have made an error or if something is missing or damaged, let us know so that we can correct the problem for you. Please include the following information:

- Name of item
- Date of Purchase
- Purchase Price (please include sales slip)
- Model number
- Place of Purchase
- Brief description of the problem

Do not return the kit to the store where you purchased it, they will not have the replacement parts!

Send all correspondence to: **NSI International, Inc.**

105 Price Parkway
Farmingdale, NY 11735-1318

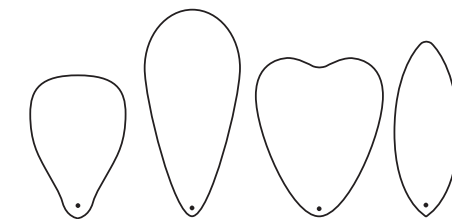

Attn: Quality Control Department Telephone: 631-501-7550

Instructions: Read instructions completely before starting this project.

Your set includes enough materials to make 8 Sequin Flowers.
There are four styles of petals, labeled A, B, C and D.

YOUR SET INCLUDES THE FOLLOWING ITEMS:

Sequins in different sizes and colors
(medium size 8mm, large size 10mm)

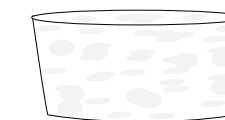

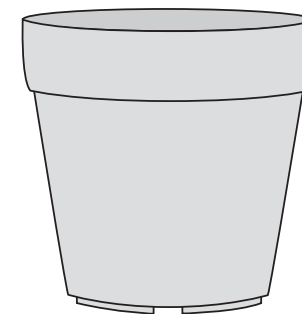

Acetate Petals

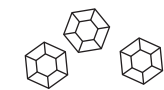

Glue

Flower Pot

Foam

Large Rhinestones (for Flower Centers)

Pipe Cleaners

Plastic Sticks
