Sand Art

WARNING:
CHOKING HAZARD-Small parts.
Not for children under 3 years.

Conforms to ASTM D-4236

No. 9345

Dear Customer,

We hope you enjoy our Sand Art set. If you find that we have made an error or if something is missing or damaged, let us know so that we can correct the problem for you. Please include the following information:

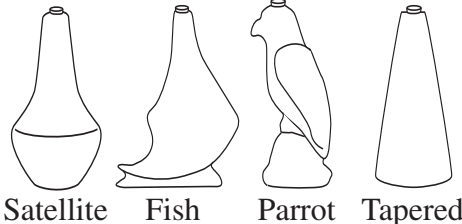

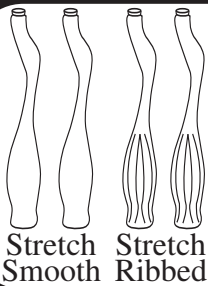

- Name of item
- Date of Purchase
- Purchase Price (please include sales slip)
- Model number
- Place of Purchase
- Brief description of the problem

Do not return the kit to the store where you purchased it, they will not have the replacement parts!

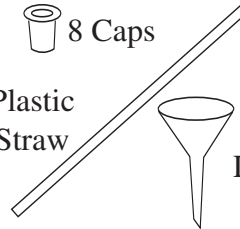

Send all correspondence to: **NSI International, Inc.**

**105 Price Parkway
Farmingdale, NY 11735-1318
Attn: Quality Control Department**

YOUR SET INCLUDES THE FOLLOWING ITEMS:

Plastic Straw

Double Face Tape

Plastic Stick

Welcome to the wonderful world of Sand Art. With this set and some creativity and imagination you will be able to create some beautiful works of art in a bottle. Please note that the bottles shown on these instructions are for illustrative purposes. The bottles in your set may be different.

WORK AREA

You should work on a level surface, and always keep your work place clean and neat. Lay down some newspaper or work on top of an old towel. This will help make for an easy clean-up.

GETTING STARTED

There are a countless numbers of designs you can create, all you need are some basic skills and your imagination. Keep your bottle in front of you at all times. The bottle will be your "Blank Canvas" and the sand will be your paint. You will create your picture inside the bottle, so keep it clearly in view while you work.

THE SAND

This kit comes with different colors of sand to create you images. It is important that you keep the colored sand from becoming mixed together. Use a rubberband on each bag to keep the sand contained.

POURING THE SAND

Now that you have chosen your bottle and your colors...place the funnel in the bottle (with the straw on the end). Using the pouring scoop, pour sand through the funnel into the bottle. It is recommended to use enough to make a 1/4 inch layer in the bottle. Repeat this step several times (2-3), each time using a different color. (Fig.1)

USING THE SHAPER

The shaper is used to shape images in the sand. Holding the bottle with one hand, and the shaper in the other. Gently press the shaper against the inside of the bottle and push down through the layers of colors. Repeat this step over and over around the bottle. Now add some more sand and repeat this step. Remember always be creative and experiment. This way you create images that are truly your own. (Fig. 2)

HAVING FUN

To complete your project, press the cap or cork into the bottle top. Make sure that the cap fits snugly against the sand. You do not want any air space at the top of the bottle, this would allow the sand to move and distort your image. (Fig. 3)

Fig. 1

Fig. 2

Fig. 3

1. Cut 1/4 inch off double sided adhesive strip.

2. Peel one side of adhesive strip.

3. Stick on to bottle and peel off other side. Then stick on eyes or other items of your choice.

Now that you have created your design in the sand, you may want to decorate it with eyes and any other items that you have around the house, like feathers, pom poms, beads, rhinestones, etc.

ANIMAL MAKING INSTRUCTION

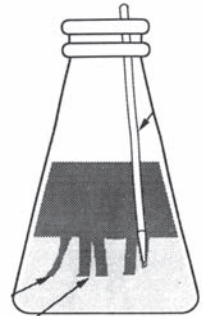

Carefully read the instructions below to make even more challenging and creative projects...
like making animal shapes! We have shown how to make one type of animal
but use your own ability and imagination to make countless others.

We will be showing you how to make an elephant.

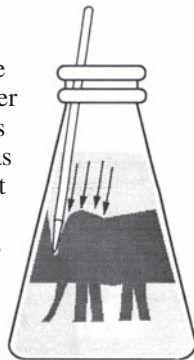

1. Place the funnel into the opening of the bottle and hold it tight. Then pour a layer of light colored sand approximately 1" thick. Next pour in a second layer of darker sand, also approximately 1" thick.

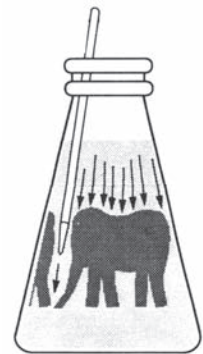

2. Holding the shaper at a slight angle, push the dark layer down about 1/2" into the light layer to form the elephant's trunk. Lift the shaper up and away from the glass. Move to the right about 1/4" and push down to form the two front legs and the lower body. Leave approximately a 1/2" between the front and back legs and form the rear legs as shown.

3. After forming the bottom half of the elephant, add another 1" layer of lighter colored sand. Level the surface of this layer. Use the picture of an elephant as shown in step 4, as a guide. Then start pushing the lighter sand down into the darker sand to shape the elephant's head.

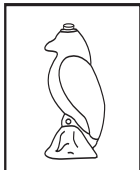

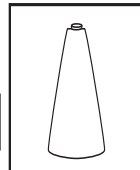

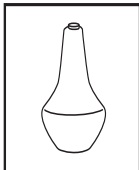

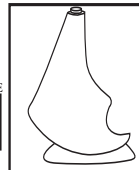

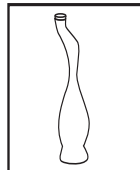

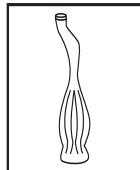

4. Push the remainder of the lighter sand down around the shape to form the finished elephant, as shown. Create as many elephants as you possibly can. The size and shape bottle you choose will determine how many you can make. For the best results use bottles with smooth surfaces.

Note: Combining different types of animals together might be very interesting...try it!
