- MSRP \$340

MISHIMOTO BEGINS PLANS FOR NEW EVOLUTION X PROJECT CAR

Mishimoto has started plans for a new project car; the Mitsubishi Evolution X. The Evolution will undergo a complete transformation, with intentions to make this already high performance vehicle unlike any other modified Evolution. The team at Mishimoto is more than eager for the final result. Keep an eye out for status updates on "The evolution of the Evolution" at Mishimoto.com.

MISHIMOTO APPAREL LINE NOW AVAILABLE

The brand-new Mishimoto Apparel line is now available. Be the first to show off these original Mishimoto inspired designs. The Mishimoto Apparel line can now be purchased directly from Mishimoto.com. Keep an eye out for new apparel and designs each season.

**THE NEW FACE OF MISHIMOTO**

We are proud to announce that RJ De Vera has partnered with Mishimoto to be an official spokesperson for Mishimoto Automotive. RJ De Vera has been a leader in the import scene for years. RJ has experience in every part of the industry from creating his own line and brand Ro_Ja, to building many top industry show cars. RJ also has starred in "The Fast and the Furious", and more recently MTV's "Life in the Fastlane". RJ will be representing Mishimoto in upcoming advertisements, videos, and making appearances at events with the Mishimoto team.

**MISHIMOTO HAS OFFICIALLY GONE GREEN**

Mishimoto has officially gone green. All Mishimoto products will now be packaged in all-natural 100% recyclable material. This will save over 12,500 lbs of non-recyclable Styrofoam per-year. We urge our consumers to dispose of old radiators and antifreeze properly. The team at Mishimoto hopes this will encourage other companies to take the initiative towards reducing the amount of waste produced by unnecessary packaging.
