

PB31SP / PB21SP

Manual Punch & Bind with Open Binding Edge and Selectable Punch Pins

Our newest line of manual tabletop finishers offers expanded functionality and flexibility for your **Wire-O®** finishing needs. Use the standard punch pattern or customize your punch hole pattern by simply pulling a punch pin lever to disable punching.

The **PB31SP Punch & Bind** punches 3:1" pitch round holes for Wire-O® documents up to 1/2" thick, and closes all Wire-O® sizes from 1/4" to 1-1/4". The **PB31SP** has 38 fully selectable 3:1 pitch punch pins and an open binding edge for maximum punching flexibility.

The **PB21SP Punch & Bind** punches 2:1" pitch round holes for thicker Wire-O® documents from 5/8" to 1-1/8" and closes all Wire-O® sizes from 1/4" to 1-1/4". The **PB21SP** has 26 fully selectable 2:1 pitch punch pins and an open binding edge for maximum punching flexibility.

TABLETOP WIRE-O® FINISHERS

Expanded Features and Functionality

- ✓ Single D-shaped handle controls both punching and Wire-O® closing with smooth effortless action for both left and right handed operation.
- ✓ Customize hole punching with easily selectable punch pins
- ✓ Handy document gauge to determine which Wire-O® size to use.
- ✓ Front mounted Wire-O® hanger securely holds your document in place for fast and effortless Wire-O® insertion and document construction.

Ideal WIRE-O® BINDING SYSTEM for Schools, Home Offices, Realtors & Financial Planners

- ✓ Wire-O® has long been the premier finishing choice for its attractive finish and high quality features:
- ✓ Pages turn easily; always lay flat & stay flat; remain in perfect registration; and open back-to-back for easy reading and copying.
- ✓ Now even the smallest of home or professional offices can produce high-quality, professional bound presentation documents for every client with this affordable dynamic duo.

Fully Selectable pull pins on both models permit custom hole punch patterns and maximum binding flexibility
