## Table and Floor Lamps

Our lamps offer a warm, rustic glow and lively conversation... All lamps have a 3-way switch and are U-L listed. The wood in our lamps was formed into its irregular shapes by long mountain winters and other forces of nature. A mystery of these lamps is how the wiring manages its way from top to bottom.

*Shades sold separately.*

# Blue-Stain Pine and Clear Pine

Most of the pictures in this catalog show our rustic aspen products. However, we can also build any of the products in either a clear pine or in a pine variation called "blue-stain" or "beetle-kill" pine.

Furniture built in either pine version features the same high quality components, attractive rustic designs, attention to detail, and hand-applied finishes as with our aspen products.

Blue-stain pine refers to the rich and attractive blue and gray hues that run through certain pine woods. This coloration is caused by beetles that attack and eventually kill the tree, hence the name "beetle-kill" pine. Like the aspen tree, blue-stain pine is cut "dead-standing" with no living trees being used. This allows Mountain Woods Furniture to manufacture beautiful furniture with an environmentally friendly process.

Clear pine has a lighter color than aspen, and the knotholes are smaller. Customers select our pine furniture to complement and contrast to aspen and many other wood varieties.
