About Author

Executive Summary

- ◆ China and India: The two most favored places for pharma outsourcing
- ◆ Advantages and disadvantages of China and India in pharma outsourcing:
Head-to-head comparison of two countries
- ◆ Strengths and shortcomings of China and India in pharma outsourcing:
Head-to-head comparison of top 50 best service providers of each country
- ◆ Which country best fits your outsourcing investment? – A series of case studies

Chapter 1. China and India: The Two Most Favored Places for Pharma Outsourcing

Summary

1.1 Introduction

- 1.1.1 World pharmaceutical industry is currently experiencing downturn and outsourcing is one of the effective solutions to quickly turn it around
- 1.1.2 Center of pharma outsourcing industry has shifted to the East
- 1.1.3 Emerging of China and India as favored places for outsourcing
 - 1. Emerging of Chinese pharma outsourcing industry
 - 2. Emerging of Indian pharma outsourcing industry

1.2 Fast development of pharma outsourcing industries in China and India

- 1.2.1 Development patterns of pharma outsourcing industry in China and India
 - 1. Development pattern of Chinese pharma outsourcing industry
 - 2. Development pattern of Indian pharma outsourcing industry
- 1.2.2 Market development of pharma outsourcing in China and India
 - 1. Market development of pharma outsourcing in China
 - a. Market development history and current market sizes of Chinese pharma outsourcing
 - b. Current market sizes of each service sector
 - 2. Market development of pharma outsourcing in India
 - a. Market development history and current market sizes of Indian pharma outsourcing
 - b. Current market sizes of each service sector
 - 3. How to compare with global pharma outsourcing markets
 - a. Current total market sizes of global pharma outsourcing industry
 - b. Current global market sizes of each service sector and their distributions

1.3 Growing importance of China and India to world pharma industry

1.4 Summary of current development trend of global pharma outsourcing industry

Chapter 2. Advantages and Disadvantages of China and India in Pharma Outsourcing: Head-to-Head Comparison of Two Countries

Summary

2.1 Introduction

2.2 General comparisons between China and India

2.2.1 Comparison of higher education systems between China and India

2.2.2 Comparison of workforce structure in pharmaceutical industry

2.2.3 Comparison of labor and raw material costs in pharmaceutical industry

2.2.4 Comparison of general industry infrastructure

2.2.5 Comparison of business philosophy

2.3 Comparison of intellectual property (IP) protection environment between China and India

2.4 Comparison of pharmaceutical industries between China and India

2.4.1 Comparison of development history of pharmaceutical industries in China and India

2.4.2 Comparison of pharmaceutical markets between China and India

1. Chinese pharmaceutical market sizes

2. Indian pharmaceutical market sizes

2.4.3 Comparison of general capabilities of pharmaceutical industry between China and India

1. Chinese pharmaceutical industry

2. Indian pharmaceutical industry

2.4.4 Comparison of drug R&D capabilities between China and India

2.5 Comparison of biotech industries between China and India

2.5.1 Chinese biotech industry

2.5.2 Indian biotech industry

2.6 Conclusions

Chapter 3. Strengths and Shortcomings of China and India in Pharma Outsourcing: Head-to-Head Comparison of Top 50 Best Service Providers of Each Country

Summary

3.1 Introduction

3.2 Comparison of overall service capabilities of pharma outsourcing in China and India

3.2.1 Overall service capability of Chinese pharma outsourcing industry

3.2.2 Overall service capability of Indian pharma outsourcing industry

3.3 Head-to-head comparison of top 50 best outsourcing service providers in each country

3.3.1 Selection of top 50 best service providers in each country

3.3.2 Criteria for selection of top 50 best service providers in each country

1. Selection criteria

2. Classification and definition of CRO/CMO service capabilities

3. Classification of players and their ratings
4. Selection
- 3.3.3 Head-to-head comparisons of selected top 50 best players in each country
 1. Comparison of service provider distributions
 2. Comparison of professional service providers in each service sector
 3. Comparison of service capabilities between Chinese companies and Indian companies
 4. Comparison of current states of internal drug R&D programs and capabilities between Chinese companies and Indian companies
 5. Comparison of service capabilities in biopharmaceutical manufacturing
 6. Comparison of global presences of Chinese companies and Indian companies
 7. Summary of head-to-head comparisons
- 3.4 Case studies: Head-to-head comparisons of typical Chinese companies with typical Indian companies
 - 3.4.1 Comparison between a Chinese CRO and an Indian CRO
 - 3.4.2 Comparison between a major Chinese pharma company and a major Indian pharma company
 - 3.4.3 Comparison between a major Chinese biotech company and a major Indian biotech company
- 3.5 How financial crisis will affect the growths of pharma outsourcing industries in both countries: Comparison of future growth potentials of pharma outsourcing industries between China and India
 - 3.5.1 Future growth potential of pharma outsourcing in China
 1. Major short-term growth resistor: Financial crisis
 2. Long term growth drivers and resistors
 - 1) Growth drivers
 - a. Internal drivers
 - b. External drivers
 - c. Three outsourcing waves
 - 2) Growth resistors: Challenges Chinese companies are going to face
 - 3.5.2 Future growth potential of pharma outsourcing in India
 1. Major short-term growth resistors: Impacts of terror attack and financial crisis
 2. Long term growth drivers and resistors
 - 1) Growth drivers
 - 2) Growth resistors

Chapter 4. Which Country Best Fits Your Outsourcing Investment? – A Series of Case Studies

Summary

4.1 Introduction

- 4.2 Analysis of real motivations behind different outsourcing strategies played by major pharma/biotech companies in China and India
 - 4.2.1 Different importance of China vs. India to major pharma/biotech companies for long term investment
 - 4.2.2 Different outsourcing strategies played in China and India by major pharma/biotech companies
- 4.3 Case studies: Examples of drug companies around the world closely collaborating with Chinese and Indian companies
 - 4.3.1 Collaboration between a major Western company and an Indian company
 - 4.3.2 Collaboration between a major Western company and a Chinese company
 - 4.3.3 Collaborations of a major Western company simultaneously with a Chinese company and an Indian company in similar therapeutic areas
- 4.4 Summaries of more outsourcing collaborations happened in recent two years between Western companies and Chinese or Indian companies
- 4.5 Where to choose your outsourcing destination: In-depth analyses of pharma outsourcing features of both China and India

Classifications of Top 100 Best Outsourcing Service Providers in China and India

1. List of top pharma companies in China and India
2. List of top biotech companies in China and India
3. List of top CROs in China and India
4. List of top CMOs in China and India
5. List of top API and generic drug makers in China and India
6. List of Chinese and Indian companies with Level 5 service capability
7. List of Chinese and Indian companies with Level 4 service capability
8. List of Chinese and Indian companies with Level 3 service capability
9. List of top CROs in China and India for drug discovery service
10. List of top CROs in China and India for process R&D
11. List of top CROs in China and India for medicinal chemistry research
12. List of top CROs in China and India for preclinical research service
13. List of top CROs in China and India for ADME/Tox study
14. List of top CROs in China and India having non-human primate animal testing facilities
15. List of top CROs in China and India for clinical research service
16. List of top CROs in China and India having central lab service
17. List of top CROs in China and India in genomics and proteomics research
