

中国基因组学和蛋白组学: 现状, 应用及前景

# Outlook of China Genomics and Proteomics Market

– Application in Molecular Biomarker, Diagnostics and  
Personalized Medicine

# Table of Contents

<b>Scope of the Report</b> .....	<b>2</b>
<b>About Author</b> .....	<b>3</b>
<b>Executive Summary</b> .....	<b>13</b>

Genomics and proteomics playing increasingly important roles in modern pharmaceutical and healthcare industries;  
Fast growth of Chinese genomics, proteomics and related industries: Current market sizes and key players;  
Current capability, products and available services of Chinese genomics, proteomics and related industries;  
Future outlook of Chinese genomics, proteomics and related industries.

## **Chapter One: Genomics and Proteomics Playing Increasingly Important Roles in Modern Pharmaceutical and Healthcare Industries ----- 21**

Summary .....	22
1.1 Introduction .....	23
1.2 Research scope, technologies employed and growth drivers of genomics and proteomics .....	26
1.2.1 Genomics .....	26
1. Definition of genomics and technologies it employs .....	26
2. Growth drivers of genomics research: High demand by pharmaceutical industry .....	28
1.2.2 Proteomics .....	30
1. Definition of proteomics .....	30
2. Research targets of proteomics and technologies it employs .....	30
1.3 Applications of genomics and proteomics in development of molecular biomarkers and diagnostic products .....	31
1.3.1 Biomarker .....	31
1. Definition and technologies most frequently used to develop biomarkers .....	31
2. Importance of biomarkers to pharmaceutical industry .....	33
1.3.2 Diagnostics .....	36
1. Technologies used in molecular diagnostics .....	36
2. Applications of genomics and proteomics to development of molecular diagnostic products .....	37
3. Examples of drug companies utilizing molecular diagnostics in their drug development .....	39
1.3.3 Molecular imaging .....	42
1. Classification of molecular imaging .....	42
2. Applications of molecular imaging in drug discovery .....	

and development -----	43
1.3.4 Relationships between genomics, proteomics and molecular biomarker, diagnostics and imaging -----	44
1. Genomics and proteomics are complementary to each other -----	44
2. Genomics and proteomics are technical basis of molecular biomarker, diagnostics and imaging -----	45
1.4 Application of genomics and proteomics in personalized medicine and translational medicine -----	45
1.4.1 Molecular biomarkers and diagnostics bridge the connection between genomics/proteomics and personalized medicine -----	46
1.4.2 Examples of application of genomics and proteomics in personalized medicine through development of molecular biomarkers and/or diagnostics -----	47
1.4.3 Genomics and proteomics research in translational medicine -----	49
<b>Chapter Two: Fast Growth of Chinese Genomics, Proteomics and Related Industries: Current Market Sizes and Key Players -----</b>	<b>50</b>
Summary -----	51
2.1 Introduction -----	53
2.2 Genomics and proteomics research in China: Development history and current state -----	54
2.3 Applications of genomics and proteomics research in China: Rapid development of Chinese molecular biomarker and diagnostic industry -----	56
2.4 Current market sizes of Chinese genomics and proteomics and related industries -----	58
2.4.1 Current market size of Chinese genomics and proteomics industry -----	59
1. Current market value of Chinese genomics and proteomics industry -----	59
2. Where China currently stands in global genomics and proteomics market -----	60
2.4.2 Current market size of Chinese IVD industry -----	61
1. Current market value of Chinese IVD industry -----	61
2. Where China currently stands in global IVD market -----	62
2.4.3 Current market size of molecular diagnostics in China -----	63
1. Current market value of Chinese molecular diagnostic industry -----	63
2. Where China currently stands in global molecular diagnostic market -----	64
2.4.4 Current market size of biomarkers in China -----	65
1. Current market value of biomarkers in China -----	65
2. Current market value of global biomarker industry -----	65
2.4.5 Current market size of Chinese medical device industry and its position in global market -----	67
2.4.6 Current market size of personalized medicines in China -----	68
1. Current market value of personalized medicines in China -----	68
2. Current market value of global personalized medicines -----	69
2.5 Current key players in Chinese genomics, proteomics and related industries -----	69
2.5.1 Selection criteria of key players -----	69

2.5.2	Classification of selected top 100 China-based best players -----	70
2.6	Examples of key players in genomics, proteomics and related industries in China -----	76
2.6.1	Major domestic companies focusing on genomics and proteomics research as well as their applications in development of molecular biomarkers and diagnostic products -----	76
2.6.2	Major multinational companies in Chinese genomics, proteomics and molecular diagnostics market -----	81
2.6.3	Other foreign companies in Chinese IVD market -----	87

**Chapter Three: Current Capability, Products and Available Services  
of Chinese Genomics, Proteomics and Related Industries ----- 89**

	Summary -----	90
3.1	Introduction -----	92
3.2	Chinese companies' capability in genomics research -----	94
3.3	Chinese companies' capability in proteomics research -----	97
3.4	Chinese companies' capability in development of molecular diagnostic products and biomarkers -----	99
3.5	Diagnostic products currently available in Chinese market -----	104
3.6	Currently available services in China in genomics, proteomics and related industries -----	112
3.6.1	Chinese companies providing genomic and proteomic research service -----	113
3.6.2	Chinese companies providing target identification and validation service -----	115
3.6.3	Chinese companies providing bioinformatics service -----	117
3.6.4	Chinese companies providing biomarker development and analytical service -----	118
3.6.5	Chinese companies providing diagnostic service (testing and product development) -----	119
3.6.6	Chinese companies providing imaging service -----	120
3.7	Available services in China for marketing and distribution of diagnostic products and medical devices -----	121
3.7.1	Foreign companies: How to register your IVD products and medical devices in China -----	122
3.7.2	Documents required -----	123
3.7.3	How to market your IVD products and medical devices in China: Local distributors -----	124

**Chapter Four: Future Outlook of Chinese Genomics, Proteomics and Related  
Industries ----- 126**

	Summary -----	127
4.1	Introduction -----	129
4.2	Future growth drivers of Chinese genomics, proteomics and related industries --	130

4.2.1	China's inherent strengths in genomics and proteomics research -----	130
4.2.2	China's general advantages for conducting R&D in biotechnology industry -----	131
	1. Large, well-trained workforce -----	132
	2. Constant emerging of new R&D-focused biotech companies in China -----	132
4.2.3	Growing demands for rapid development of molecular biomarkers and diagnostic products by pharmaceutical industry -----	133
4.2.4	Experienced multinational biotech companies entering Chinese market and collaborating with local Chinese organizations are promoting the fast development of the Chinese industry -----	134
4.2.5	Government support -----	135
4.2.6	Increasing availability of R&D funding -----	138
	1. Various funding sources from government agencies -----	138
	2. Increasing funding opportunities from venture capital (VC) investors -----	139
4.2.7	Fast growth of Chinese pharmaceutical market is prompting the fast growth of biomarker and diagnostic industry in China -----	141
4.3	Future outlook of Chinese diagnostic industry -----	143
4.4	Future outlook of outsourcing opportunities in genomics and proteomics research in China -----	145
4.5	R&D capability of Chinese companies in development of novel molecular diagnostic products -----	146
4.6	Existing issues in China's genomics, proteomics and related industries -----	149
4.7	Future market growth outlook of Chinese genomics, proteomics and related industries -----	150
4.7.1	Future growth forecast of Chinese genomics and proteomics market --	151
	1. Future market growth of Chinese genomics and proteomics -----	151
	2. Where China will stand in global genomics and proteomics market by 2015 -----	152
4.7.2	Future growth forecast of Chinese IVD market -----	153
	1. Future growth of Chinese IVD market -----	153
	2. Where China will stand in global IVD market by 2015 -----	155
4.7.3	Future growth forecast of Chinese molecular diagnostic market -----	157
	1. Future growth of Chinese molecular diagnostic market -----	157
	2. Where China will stand in global molecular diagnostic market by 2015 -----	158
4.7.4	Future growth forecast of Chinese biomarker market -----	159
	1. Forecasted future growth of Chinese biomarker market -----	160
	2. Where China will stand in global biomarker market by 2015 -----	161
4.7.5	Future growth forecast of Chinese imaging market -----	163
	1. Forecasted future growth of Chinese imaging market -----	163
	2. Where China will stand in global imaging market by 2015 -----	164
4.7.6	Future growth forecast of Chinese medical device market -----	165
4.7.7	Future growth forecast of Chinese personalized medicine market -----	166
	1. Forecasted future growth of Chinese personalized medicine	

market -----	166
2. How to compare with future growth of global personalized medicine market -----	166
4.8 Comparison of genomics, proteomics and related industries between China and India -----	167
4.8.1 Genomics and proteomics research in India -----	168
4.8.2 Comparison of biotech industry between China and India -----	169
4.8.3 Comparison between China and India of future market growth potentials of genomics, proteomics and related industries -----	172

**Company Profile ----- 177**

Selected top 100 China-based best players in genomics, proteomics and related industries -----	178
---	-----

**Appendix ----- 280**

Appendix I. Research Methodology -----	281
Appendix II. About JZMed, Inc. -----	282

**List of Tables**

Table 1. Recent examples of partnership between major pharma companies and academic institutions on genomics and proteomics research -----	24
Table 2. Research scope and contents in each area of genomics research -----	27
Table 3. New technology developments in microarray -----	28
Table 4. Classification of biomarkers -----	31
Table 5. Technologies for biomarker development -----	32
Table 6. Applications of biomarkers in drug development -----	34
Table 7. Technologies for development of molecular diagnostic products -----	37
Table 8. Driving factors of fast development of global diagnostic industry -----	38
Table 9. Research collaborations between Abbott Lab and other major pharma companies on development of companion diagnostics -----	39
Table 10. Examples of major pharma companies collaborating with biotech companies to co-develop molecular biomarkers or companion diagnostics -----	40
Table 11. Examples of molecular biomarkers successfully developed for cancer drugs -----	41
Table 12. Classification of molecular imaging -----	43
Table 13. Relationship between genomics and proteomics -----	44
Table 14. Relationships between genomics/proteomics and molecular biomarker/diagnostics -----	45
Table 15. Relationships between genomics, proteomics, molecular biomarker, diagnostics and personalized medicine -----	46
Table 16. Examples of successfully developed personalized medicines -----	48
Table 17. Key drivers for fast growth of Chinese IVD market -----	59

Table 18. Current market value and growth history of Chinese genomics and proteomics industry -----	60
Table 19. Current market value and growth history of Chinese IVD market -----	61
Table 20. Current market value and growth history of global IVD market -----	62
Table 21. Current market value and growth history of Chinese molecular diagnostic industry -----	63
Table 22. Current market value and growth history of global molecular diagnostic market -----	64
Table 23. Current market value and growth history of global biomarker industry -----	65
Table 24. Current market value and growth history of global cardiovascular biomarkers -----	66
Table 25. Current export value and growth history of Chinese-made medical devices marketed overseas -----	67
Table 26. China division of multinational companies in genomics, proteomics and related industries -----	71
Table 27. Joint ventures between Chinese companies and foreign companies in genomics, proteomics and related industries -----	72
Table 28. Domestic Chinese companies focusing on genomics and proteomics research or development and marketing of molecular biomarkers and diagnostic products -----	72
Table 29. Locations of China-based companies in genomics, proteomics and related industries -----	75
Table 30. Latest developments and collaborations of BGI with multinational companies -----	77
Table 31. List of new products recently approved by SFDA and launched by China Medical Technologies -----	79
Table 32. Latest examples of Roche collaborating with local Chinese companies ----	83
Table 33. Latest collaborations between Qiagen and local Chinese companies/research institutions -----	86
Table 34. Other foreign companies currently actively pursuing for a foothold in the Chinese genomics, proteomics and IVD market -----	87
Table 35. Technical capability of Chinese companies in genomics research -----	94
Table 36. List of China-based best players conducting genomic research and their capability -----	96
Table 37. Technical capability of Chinese companies in proteomics research -----	97
Table 38. List of China-based best players conducting proteomic research and their capability -----	98
Table 39. Technical capability of Chinese companies in developing molecular diagnostic products -----	99
Table 40. List of China-based best companies developing diagnostic methods and products and their capability -----	100
Table 41. Distributions of selected China-based top players in each technical area --	104
Table 42. List of diagnostic reagents currently available in Chinese market -----	106
Table 43. List of diagnostic test kits currently available in Chinese market -----	108
Table 44. Focused disease of molecular diagnostic products offered by China-based companies -----	110

Table 45. List of China-based companies providing genomics and proteomics research service -----	113
Table 46. List of China-based companies providing target identification/validation service -----	116
Table 47. List of China-based companies providing bioinformatics service -----	117
Table 48. List of China-based companies providing biomarker development and analytical service -----	118
Table 49. List of China-based companies providing diagnostic testing service -----	119
Table 50. List of China-based companies providing imaging service -----	120
Table 51. List of documents required by SFDA for registration of IVD products and medical devices in China -----	123
Table 52. Services provided by local Chinese distributors or agents for marketing IVD products and medical devices in China -----	124
Table 53. List of China-based companies providing IVD product/medical device marketing/distribution service and their service capability -----	125
Table 54. Unique combination of various resources China presently possesses -----	129
Table 55. List of drivers for future growth of Chinese genomics, proteomics and related industries -----	130
Table 56. List of 14 high priority programs identified by Chinese government for development of new diagnostic products and technologies -----	137
Table 57. Factors positively influencing and improving the investment environment in Chinese biotech industry -----	139
Table 58. Examples of intense investment activities in Chinese genomics and proteomics industry -----	140
Table 59. Future growth drivers of Chinese pharmaceutical market -----	142
Table 60. Areas that will have fast growth potential in Chinese IVD market -----	144
Table 61. New diagnostic products under development in pipelines of Chinese biotech companies -----	147
Table 62. Forecasted market growth of Chinese genomics and proteomics industry -----	151
Table 63. Forecasted market growth of global genomics and proteomics industry ---	152
Table 64. Forecasted market growth of Chinese IVD industry -----	153
Table 65. Key drivers for future growth of Chinese IVD market -----	154
Table 66. Forecasted market growth of global IVD industry -----	155
Table 67. Forecasted growths of combined IVD market values of developed and emerging countries -----	156
Table 68. Forecasted market growth of Chinese molecular diagnostic industry -----	157
Table 69. Forecasted market growth of global molecular diagnostic industry -----	158
Table 70. Forecasted future growth of Chinese biomarker market -----	160
Table 71. Forecasted future growth of global biomarker market -----	161
Table 72. Forecasted future growth of global cardiovascular biomarker market -----	162
Table 73. Forecasted future growth of Chinese imaging market -----	163
Table 74. Forecasted future growth of global imaging market -----	164
Table 75. Forecasted future growth of Chinese medical device market -----	165
Table 76. Forecasted future growth of global personalized medicine market -----	167
Table 77. Comparison of future market growth potential of genomics and	

proteomics industry between India and China -----	173
Table 78. Comparison of future market growth potential of IVD industry between India and China -----	174
Table 79. Comparison of future growth potential of molecular diagnostic market between India and China -----	175

### List of Figures

Figure 1. Graphic display of the relationships between genomics, proteomics, biomarker and diagnostics and personalized medicine -----	47
Figure 2. Past growth trend of Chinese genomics and proteomics industry -----	60

### List of Case Studies

Case Study 1. Increasing applications of biomarkers in pharmaceutical industry ----	35
---	----

Case Study 2. Major pharma companies developing personalized medicines through collaborating with specialty biotech companies -----	48
Case Study 3. Examples of Chinese companies developing new technologies in molecular diagnostics -----	57
Case Study 4. Beijing Genomics Institute (BGI) -----	76
Case Study 5. China Medical Technologies -----	78
Case Study 6. China Sky One Medical, Inc. -----	80
Case Study 7. Shanghai Biochip -----	80
Case Study 8. Roche Diagnostics Shanghai -----	81
Case Study 9. Abbott Diagnostics China -----	84
Case Study 10. Beckman Coulter -----	85
Case Study 11. Qiagen N. V. -----	86
Case Study 12. PerkinElmer -----	87
Case Study 13. Collaborations between major pharma companies and Chinese research institutions on genomics and proteomics research -----	92
Case Study 14. Major pharma companies establishing China R&D center to conduct innovative drug research in China including genomics- and proteomics-related research -----	93
Case Study 15. Foreign IVD companies showing great interest in marketing their products in Chinese market -----	121
Case Study 16. Chinese companies providing marketing service to foreign companies marketing their IVD products in Chinese market -----	121
Case Study 17. Experienced multinational companies entering Chinese genomics, proteomics and diagnostics markets -----	134
Case Study 18. Collaboration between multinational companies and local Chinese counterparts -----	135
Case Study 19. Examples of Chinese company developing advanced diagnostic technologies -----	148
Case Study 20. Collaboration between Chinese biopharma companies and Indian counterparts in developing biogenerics -----	171
