## **About JZMed, Inc.**

JZMed, Inc. is a leading pharmaceutical outsourcing service provider that specializes in services for pharmaceutical and biotechnology industry. The company's primary focus is to help Western pharmaceutical and biotech companies explore the opportunities in China, including tapping the Chinese pharmaceutical market and the resources available in Chinese pharmaceutical industry. Meanwhile, it also provides intelligence and market research services to these companies to facilitate their entrance into the Chinese pharmaceutical market or collaborations with any Chinese companies. The company has had opportunities to provide services to and collaborate with a variety of pharmaceutical and biotech companies worldwide that focus on drug discovery, development and/or manufacturing. It also has a network of preferred contract pharmaceutical research and manufacturing companies in China.

## Report description

It has been well recognized that the global pharmaceutical industry is facing a number of challenges at present. The difficulties the industry is experiencing have forced all drug companies to change their current operation models. They are now forced to pursue more efficient, cost-effective and productive ways to conduct their operations, whether in R&D or manufacturing. The keys for them to make a quick turnaround are to get drug discovered quicker, developed faster, manufactured cheaper and marketed wider.

Outsourcing has been proven to be one of the effective solutions for drug companies to quickly turn the situation around as it provides them with the desired efficiency, flexibility and agility. Among all emerging countries for outsourcing, China has risen rapidly and become star in the global pharmaceutical outsourcing arena as it possesses the unique combination of low cost and quality service. The current global financial crisis has also greatly enhanced the importance of the country to many drug companies around the world who are vigorously seeking cost reduction. However, to many companies who are interested in conducting outsourcing or investment in China, it is always a challenge to decide which Chinese service provider best fits their investment goals.

The report, “**Top 50 Best Pharma Outsourcing Service Providers in China**” (an appendix to the report “**Comparison of Pharma Outsourcing between China and India**”, which, separately published by JZMed, Inc.), selected, among a large pool of outsourcing service providers, 50 best players in China and compiled their detailed company profiles.

The report contains the most valuable and desirable information sought by all pharmaceutical and biotech companies who are interested in outsourcing to China. After looking into the report, outsourcing companies will become comfortable directly approaching the interesting service providers. The report will thus save them a preliminary trip to the country, which generally includes a team of company executives, before they start contacting the identified service providers, therefore saving them a substantial amount of cost and time.

## **Selection criteria**

The top 50 best players in China are carefully selected based on the following criteria. Each player must:

- 1) Be publicly recognized as a major player; or
- 2) Be one of the largest in company size and service revenue in the industry sector;  
or
- 3) Have long existing service history in the industry; or
- 4) Be most active in their industry sector; or
- 5) Have the broadest service scope and the strongest service capabilities in their industry sector; or
- 6) Be the best in some special technical areas even though the company is not big and/or old enough in their industry sector.

## **Categories Examined for Each Service Provider**

For each selected best outsourcing service provider in China, the report examined a total of twelve technical areas (in addition to detailed contact information) to comprehensively measure their service capabilities. These areas are considered the most important for an outsourcing company to know when it looks for a service provider in China.

These examined areas include:

1. Full description of each provider's service scope;
2. Analysis and comments of their service features and strengths;
3. Evaluation of their service capability levels according to international pharma outsourcing standard;
4. Description of their facility and capacity;
5. In-house products that are ready to offer;
6. The number of technical employees including the percentage of senior level scientists;
7. Year the service company was founded;
8. Service experience and customers each provider has served so far;
9. Latest annual service revenues;
10. Background of service provider's founder(s) or current executive(s) including their scientific/education merits and work experiences.
11. Overall rating of a service provider among all selected CROs and CMOs;
12. Latest business move/development.

# Table of Contents
