

1990 – 1993 Dash Insert Installation Instructions

Remove the gauge cluster from the car.
Remove the 6 Torx screws that fasten the black bezel in place.

Once the black bezel is removed. Peel the protective paper from the back of the Dash Inserts. Carefully align the insert and press it in place. Repeat for the opposite side.

Re-install the black plastic bezel onto the gauge cluster. Fasten it in place with the 6 Torx screws.

Peel the protective paper from the back of the center insert and install it over the warning light panel.
