**3M™ NOMAD™ ENTRANCE MATS**

- Dual-fiber construction for exceptional dirt and water removal
- Fibers resist staining and fading; mats look new longer
- Slip-resistant vinyl backing will not stain floor

Large, crush-resistant polypropylene fibers scrape off loose dirt not removed by outdoor scraper matting; tough, looped nylon fibers wick away water. Pattern designs hide unsightly soil between cleanings. Vacuum or use extraction method to clean. Studies have shown that 2.5-6 times more dirt and soil is removed by 3M™ Nomad™ Scraper Matting than competitive matting. Less dirt and soil tracked into facilities means reduced time, effort and energy required to keep floors clean. Fewer cleaning chemicals are required to maintain floors, which translate to fewer chemicals entering the environment, fewer volatile organic compounds (VOCs) and other indoor contaminants being released inside a facility, helping to improve indoor air quality.
