Measuring & Ordering Information

Complete Order Information section below using steps 1 through 4.

Step 1

Canopy Model Numbers 4 through 10: Using the chart provided, choose the appropriate canopy model# that matches the projection that best fits your needs. If mounting over an out swinging door use at least a model # 7.

Step 2

Canopy Width: Measure outside width of door casing. Add at least 3" - 5" on each side for proper appearance (Be sure light fixtures are not in the way). Custom widths up to 180" in 1" increments.

Step 3

Canopy Supports: All canopies will be shipped with support arms unless optional sidewings only are ordered. Support arms require 3" of mounting space over door. If sidewings are desired, measure from top of door (B) to determine available space for mounting. Standard sides require 13" (B). Low mount sides require 6" (B).

Step 4

Color/Pattern Choice: Select the color(s) and pattern that best compliments your home. The canopy top may be ordered in a solid color or striped pattern. Sidewings available in solid color only.

Special Orders Are Not Returnable. Verify All Information Before Ordering.
