

ON OUR RADAR

ODOR EATERS FOR YOUR CLOSET

As we head into the rainy, damp Island winter, it's nice to know there's a new weapon we can add to our arsenal of closet odor fighters: FRESHhanger.

It's a fragrance-free sleeve that slips over any ordinary clothes hanger and helps eliminate odors, from smoke to body and chemical odors. Its laboratory-tested activated carbon material is said to be the most odor-absorbent material known to man. It also protects clothes from deterioration and fading.

FRESHhanger is nonallergenic and emits no fragrances. Each sleeve lasts about six months. The makers say it even absorbs harmful dry-cleaning chemicals. It comes in packs of four and sells for \$10 at www.freshhanger.com or from www.Amazon.com.
